development model In the past however they adapted to patterns set by the central state By exploiting the possibilities in government policies in different areas such as finance labour relations and regional policies the large firms were able to induce their main interlocutors the state banks labour unions workers and small firms to adjust in a way which was congruent with their own interests From subservient economic agents they became the drivers of economic adjustment Through this case study of readjustment in France this book offers a subtle critique of neo institutionalist perspectives on firms Institutional frameworks do not simply offer scenarios for adjustment but are themselves constructions of economic and political actors and therefore subject to change and reorganization By analysing how large firms in France arguably one of the least likely places to harbour such endogenous capacities changed their institutional environment to fit their own needs this book offers an important new perspective on the political economy of industrial and economic change *Transforming Automobile Assembly* Koichi Shimokawa, Ulrich Jürgens, Takahiro Fujimoto, 2012-12-06 Five years after the publication of MIT's lean production book practitioners and academics from Japan USA and Europe present new concepts findings and conclusions in regard to one of the most critical areas of automobile production The focus of the book is to explore automation and work organization for the final assembly operations in the world automobile industry The authors are company practitioners in charge of planning assembly operations and academic researchers drawing from recent empirical work Thus the book presents a multi faceted view on a development of critical importance for future development of the industry The book is rich with figures fotos tables thus making the text vivid easy to understand and illustrative
