Indigenous Knowledge Systems integration into STEM education: A Zimbabwean perspective Sunzuma G,Zezekwa N,Mudzamiri E,Chikuvadze P,2025-05-25 The inclusion of Indigenous Knowledge Systems IKS in STEM education is a crucial step towards decolonizing knowledge and creating inclusive relevant learning spaces that reflect culture This book examines the theoretical practical and contextual aspects of incorporating IKS into Zimbabwe's STEM curriculum with a focus on high school education The book is a reflection of the realization that education systems in postcolonial societies like Zimbabwe must do more than simply propagate traditional Western paradigms. The lived experiences past events and educational institutions of their society must be reflected on and informed by them The rich Indigenous knowledge in Zimbabwe has played a significant role in shaping communities understanding of agriculture health engineering mathematics and the environment over time Still much of this knowledge has been marginalized in formal education By providing a framework for the meaningful integration of IKS into STEM disciplines this work seeks to close that gap Indigenous Knowledge Systems are introduced in Chapter 1 detailing their origin development and philosophical basis Chapter 2 An Examination of the current integration of IKS into STEM education in Zimbabwe taking into account curricular approaches and classroom practice Chapter 3 highlights the importance of evaluating and assessing integration efforts by proposing culturally sensitive and multidimensional approaches that are appropriate for Zimbabwean classrooms In Chapter 4 we explore the challenges and obstacles to achieving successful IKS STEM integration such as teacher readiness epistemological tensions and systemic resistance Chapter 5 offers an exceptional examination of how Indigenous knowledge artefacts and practices can be utilized for conceptual development in high school STEM instruction with practical examples from Zimbabwean communities being included in the analysis It is aimed at teachers researchers and practitioners of decolonial education practices as well as policymakers and teacher trainers to develop locally relevant and globally relevant pedagogies We aspire that this work will contribute to advancing scholarship that recognizes Indigenous knowledge as essential living science and promotes African learners as both recipients and producers of valuable knowledge Library of Congress Catalog: Motion Pictures and Filmstrips Library of Congress,1968 **Department of Energy Research and Development** Programs--fiscal Year 1987 United States. This book uses the perspectives of embodied cognition and conceptual metaphor to explore how learners make sense of these concepts That is it is assumed that human cognition including scientific cognition is grounded in the body and in the material and social contexts in which it is embedded Understanding abstract concepts is therefore grounded via metaphor in knowledge derived from sensory and motor experiences arising from interaction with the physical world The volume consists of nine chapters that examine a number of intertwined themes how systematic metaphorical mappings are implicit in scientific language diagrams mathematical representations and the gestures used by scientists how scientific modelling relies fundamentally on metaphor and can be seen as a form of narrative cognition how implicit metaphors can be the sources of learner misconceptions how conceptual change and the acquisition of scientific expertise involve learning to coordinate the use of multiple implicit metaphors and how effective instruction can build on recognising the embodied nature of scientific cognition and the role of metaphor in scientific thought and learning The volume also includes three extended commentaries from leading researchers in the fields of cognitive linguistics the learning sciences and science education in which they reflect on theoretical methodological and pedagogical issues raised in the book This book was originally published as a special issue of the International Journal of Science Education Handbook of Research on Science Education, Volume II Norman G.
