

A group of 78 third-grade students in a midwestern elementary school took a "self-concept" test that measured how well they felt about themselves. Higher scores indicate more positive self-concepts. A histogram and some summary statistics from Minitab for these students' self-concept scores are given below.

Descriptive Statistics: SelfConcept

Variable	N	Mean	Median	TrMean	StDev	SE Mean
SelfConcept	78	56.96	59.50	57.81	12.41	1.41
Variable	Minimum	Maximum	Q1	Q3		
SelfConcept	20.00	80.00	51.00	66.25		

1. Draw an appropriate density curve for summarizing the histogram on the graph above. How would you describe the shape of this density curve?

skewed left

2. One student in the group had a self-concept score of 62. Thirty-four students had self-concept scores higher than 62. Describe the location of this value within the distribution using raw data, percentiles, and standardized values (z-scores).

score of 62 : $\frac{44}{78} = 56.4\%$ percentile

$z = \frac{62 - 56.96}{12.41} \approx 0.41 \rightarrow$ about 0.41 standard deviations above the mean

3. What is a "typical" self-concept score for a third-grader in this group? Justify your answer.

59.5 $\rightarrow$ use the median in a skewed distribution to measure the center because it is more resistant to extreme observations

Statistics for the Behavioral Sciences Susan A. Nolan, Thomas E. Heinzen, 2011-02 Nolan and Heinzen's engaging introduction to statistics has captivated students with its easy readability and vivid examples drawn from everyday life The mathematics of statistical reasoning are made accessible with careful explanations and a helpful three tier approach to working through exercises Clarifying the Concepts Calculating the Statistics and Applying the Concepts New pedagogy end of chapter

material and the groundbreaking learning space StatsPortal give students even more tools to help them master statistics than ever before **Essentials of Statistics for the Behavioral Sciences** Susan A. Nolan, Thomas Heinzen, 2010-02-12

Enables students to learn how to choose the appropriate statistical test understand its conceptual significance and calculate each statistics The text teaches students to apply concepts and formulas to statistical questions that they will encounter both in their academic lives and outside the classroom **Frontiers of Statistical Decision Making and Bayesian Analysis**

Ming-Hui Chen, Peter Müller, Dongchu Sun, Keying Ye, Dipak K. Dey, 2010-07-24 Research in Bayesian analysis and statistical decision theory is rapidly expanding and diversifying making it increasingly more difficult for any single researcher to stay up to date on all current research frontiers This book provides a review of current research challenges and opportunities While the book can not exhaustively cover all current research areas it does include some exemplary discussion of most research frontiers Topics include objective Bayesian inference shrinkage estimation and other decision based estimation model selection and testing nonparametric Bayes the interface of Bayesian and frequentist inference data mining and machine learning methods for categorical and spatio temporal data analysis and posterior simulation methods Several major application areas are covered computer models Bayesian clinical trial design epidemiology phylogenetics bioinformatics climate modeling and applications in political science finance and marketing As a review of current research in Bayesian analysis the book presents a balance between theory and applications The lack of a clear demarcation between theoretical and applied research is a reflection of the highly interdisciplinary and often applied nature of research in Bayesian statistics The book is intended as an update for researchers in Bayesian statistics including non statisticians who make use of Bayesian inference to address substantive research questions in other fields It would also be useful for graduate students and research scholars in statistics or biostatistics who wish to acquaint themselves with current research frontiers **Explaining**

Psychological Statistics Barry H. Cohen, 2008 This comprehensive graduate level statistics text is aimed at students with a minimal background in the area or those who are wary of the subject matter The new edition of this successful text will continue to offer students a lively and engaging introduction to the field provide comprehensive coverage of the material and will also include examples and exercises using common statistical software packages SPSS *Union List of Serials in*
