rarely feasible or even desirable Systems cannot be transferred without being significantly reshaped Instead the book focuses on the process of hybridization the complex interaction of productive models with national and societal effects Hybridization it is argued is inevitable But this should be seen not simply as a process of compromise and retreat but also as an important dynamic of innovation and learning This book is from the French based international research network GERPISA Groupe d'étude de recherche permanent sur l'industrie et les salaires de l'automobile See related titles below
