Theo A. F. Kuipers, Anne Ruth Mackor, 1995 This collection of 17 articles offers an overview of the philosophical activities of a group of philosophers who have been working at the Groningen University. The meta-methodological assumption which unifies the research of this group holds that there is a way to do philosophy which is a middle course between abstract normative philosophy of science and descriptive social studies of science. On the one hand it is argued with social studies of science that philosophy should take notice of what scientists actually do. On the other hand however it is claimed that philosophy can and should aim to reveal cognitive patterns in the processes and products of scientific and common sense knowledge. Since it is thought that those patterns can function as guidelines in new research and or in research in other disciplines philosophy can nevertheless hold on to the normative aim which is characteristic of classical philosophy of science. Compared to this common assumption there is a diversity of subjects. Some papers deal with general problems of science knowledge cognition and argumentation others with topics relating to foundational problems of particular sciences. Therefore this volume is of interest to philosophers of science to philosophers of knowledge and argumentation in general to philosophers of mind as well as for scientists working in the physical and applied sciences biology psychology and economy who are interested in the foundations of their disciplines. After a foreword by Leszek Nowak and a general introduction by the editors the book is divided into four parts with special introductions. I Conceptual Analysis in Service of Various Research Programmes Henk Zandvoort Rein Vos Rick Looijen Gerben Stavenga Ren e Dalitz II The Logic of the Evaluation of Arguments Hypotheses Default Rules and Interesting Theorems Erik Krabbe Theo Kuipers Alfons Keupink Maarten Janssen Yao Hua Tan Bert Hamminga III Three Challenges to the Truth Approximation Programme Sjoerd Zwart Hinne Hettema Theo Kuipers Roberto Festa IV Explicating Psychological Intuitions Anne Ruth Mackor Jeanne Peijnenburg Lex Guichard Michel ter Hark. The Groningen research group was recently qualified by an official international assessment committee as one of the best philosophy research groups in the Netherlands **Statutes and Ordinances of the University of Cambridge 2007**
