coverage of both technical and investigative skills Thoroughly covers modern devices networks and the Internet Addresses online and lab investigations documentation admissibility and more Aligns closely with the NSA Knowledge Units and the NICE Cybersecurity Workforce Framework As digital crime soars so does the need for experts who can recover and evaluate evidence for successful prosecution Now Dr Darren Hayes has thoroughly updated his definitive guide to digital forensics investigations reflecting current best practices for securely seizing extracting and analyzing digital evidence protecting the integrity of the chain of custody effectively documenting investigations and scrupulously adhering to the law so that your evidence is admissible in court Every chapter of this new Second Edition is revised to reflect newer technologies the latest challenges technical solutions and recent court decisions Hayes has added detailed coverage of wearable technologies IoT forensics 5G communications vehicle forensics and mobile app examinations advances in incident response and new iPhone and Android device examination techniques Through practical activities realistic examples and fascinating case studies you ll build hands on mastery and prepare to succeed in one of today s fastest growing fields LEARN HOW TO Understand what digital forensics examiners do the evidence they work with and the opportunities available to them Explore how modern device features affect evidence gathering and use diverse tools to investigate them Establish a certified forensics lab and implement best practices for managing and processing evidence Gather data online to investigate today s complex crimes Uncover indicators of compromise and master best practices for incident response Investigate financial fraud with digital evidence Use digital photographic evidence including metadata and social media images Investigate wearable technologies and other Internet of Things devices Learn new ways to extract a full file system image from many iPhones Capture extensive data and real time intelligence from popular apps Follow strict rules to make evidence admissible even after recent Supreme Court decisions

Mobile Tech Report 2014 John R. Roberts, 2014-01-10 If you read technology news you ll notice it s not just a story of amazing new product introductions or even that plus copycat product introductions All the usual aspects of business are there fierce competition new contenders old survivors great ideas but business failures mediocre ideas that somehow seem to succeed and prosper As a reporter commentator and blogger on mobile technology I ve collected what happened in the industry in 2013 and make predictions on what will and won t happen in 2014 You can read what did happen in the mobile technology in 2013 Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement This way you can dive into any detail level you desire read my news feed for the overview or follow the related web link to the longer article History is moving so fast now that it is all recorded electronically but I m surprised no one else has collected it and presented it for consideration Here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed It s often overlooked that the technology industry is an industry By that I mean its main concerns are profit and growth As consumers we love the new products and unique abilities we are gaining from technology but it is a business akin to any other trying to seduce us to pry

money out of our wallets So I cover the horse race aspect of the business who's up who's down Is that changing Is that likely to change The longer implications of what the technology industry is doing are vast and social We are moving to an always on always connected society where we can communicate with someone instantly and find an answer to any question quickly The entire database of human knowledge is now available in the palm of your hand whenever you desire it Everything is there the good the bad right and wrong hate and love music and noise We are obsessed with technology not in and of itself but as a means to an end Technology is the means to satisfy our curiosity or even our desire for self expression We are taking photos machine gun style with our smartphones and choose the few to share As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years He gave some boring answer about Moore's Law but the real answer is that computers are in their teenage years They are growing and growing They will not always do so So too the technology industry is in a state of rapid change I see the shift to smaller devices as a new paradigm smashing some businesses and growing others into giants Their stories are here in the news In short here are predictions for what won't and will happen in 2014 for the mobile technology industry breakdowns of marketshare figures on the horse race aspect of the business chapters on Apple Samsung Google Microsoft Nokia Blackberry Amazon Yahoo news about social media giants Facebook Twitter Google LinkedIn Foursquare SnapChat and the carriers themselves Verizon AT T Sprint and T Mobile You can also review my 2013 mobile predictions and see my track record on predictions Finally there are some essays on how all this mobile tech is figuring into our lives I've divided the news into the subjects it covers but also put in the appendix all the news as it came out in chronological ordering You can read the firehose of events in the appendix or just read about one topic at a time in the earlier chapters Table of Contents Preface Introduction Chapter 1 2014 Predictions Chapter 2 Mobile Marketshare Chapter 3 Apple Chapter 4 Samsung Chapter 5 Google Chapter 6 Microsoft Chapter 7 Nokia Chapter 8 Blackberry Chapter 9 Amazon Chapter 10 Social Media Chapter 11 Yahoo Chapter 12 Carriers Chapter 13 2013 Predictions Chapter 14 Essays Appendix

Advances in Digital Forensics XII Gilbert Peterson, Sujeet Sheno, 2016-09-19

Digital forensics deals with the acquisition preservation examination analysis and presentation of electronic evidence Networked computing wireless communications and portable electronic devices have expanded the role of digital forensics beyond traditional computer crime investigations Practically every crime now involves some aspect of digital evidence digital forensics provides the techniques and tools to articulate this evidence Digital forensics also has myriad intelligence applications Furthermore it has a vital role in information assurance investigations of security breaches yield valuable information that can be used to design more secure systems Advances in Digital Forensics XII describes original research results and innovative applications in the discipline of digital forensics In addition it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations The areas of coverage include Themes and

P. Walter Professor of Computer Science and a Professor of Chemical Engineering at the University of Tulsa Tulsa Oklahoma USA

Opportunities and Constraints of Land Management in Local and Regional Development Erwin Hepperle, Jenny Paulsson, Vida Maliene, Reinfried Mansberger, Anka Lisec, Sonia Guelton, 2018-09-17 Land Management is normally embedded in a complex legal context which frequently consists of contradictory objectives such as strengthening of rural areas satisfying the need for affordable living and commercial space protecting environment and health supporting transport infrastructure development and preserving the landscape Land management can be understood as a process that comprises coordination of such activities while managing the use and the development of land resources It can be constrained by the land use specifications resulting from spatial planning process Along with this the legal framework often contains generally formulated concepts and open standards which provide a range of opportunities for realization while balancing the different interests In this process it is important if and how both constraints and opportunities are recognised by the actors In this volume this topic is examined from various aspects first the problems in promoting mutual understanding between researchers and the general public but also among scientists of different disciplines second the success requirements of land management instruments as well as unfortunate experience caused by land use changes third covering land management costs by absorbing value increase and other trade off aspects and fourth supporting land management by providing geodata with low cost methods

Advances in Computer Science and its Applications Hwa Young Jeong, Mohammad S. Obaidat, Neil Y. Yen, James J. (Jong Hyuk) Park, 2013-11-23 These proceedings focus on various aspects of computer science and its applications thus providing an opportunity for academic and industry professionals to discuss the latest issues and progress in this and related areas The book includes theory and applications alike

Mobile Services for Toy Computing Patrick C. K. Hung, 2015-08-24 The goal of this book is to crystallize the emerging mobile computing technologies and trends by focusing on the most promising solutions in services computing The book will provide clear proof that mobile technologies are playing an increasingly important and critical role in supporting toy computing The goal of this

book is to bring together academics and practitioners to describe the use and synergy between the above mentioned technologies This book is intended for researchers and students working in computer science and engineering as well as toy industry technology providers having particular interests in mobile services Big Data Analytics Kim H.
