Specification Method for Smart Environments Maik Wurdell, 2011 This thesis is concerned with the development of interactive systems for smart environments One of the characteristic of smart environments is the need to support different interaction paradigms at runtime On the one hand interaction is performed explicitly the user performs an action in order to

interact with the system e.g. pressing a button to adjust the light. On the other hand, actions of the user are interpreted by the smart environment even though they have not been performed primarily to interact with the system (implicit interactions) e.g. walking to the speaker's desk to give a talk. A smart environment tries to infer those interactions to assist the user in her work e.g. display slides at the projection canvas. Both interaction paradigms originate from different research fields and are currently treated independently although implicit and explicit interaction mutually influence each other and occur interleaved. The thesis introduces a task modeling language in order to cope with the given requirements of smart environments which can be used to perform interaction development for smart environments in a model-based fashion for both interaction paradigms.

Big Book of Self-Reliant Living Walter Szykitka, 2009-10-14 Rural homesteaders and urban apartment dwellers alike will find a mother lode of practical information packed into this completely revised and updated edition of the ultimate how-to handbook for all generations. A selective compendium of public domain documents it brings together in one volume a wealth of knowledge and useful instruction on just about every imaginable aspect of self-sufficiency: from building a dwelling and growing food to raising children using tools of all kinds and yes getting more mileage out of your car. Readers will learn how to build a greenhouse, administer first aid, stock an emergency shelter, survive in the wilderness at sea and in the city, plant, buy farmland, grow plants indoors and out, read architect's drawings, care for household pets, repair clothing, hunt, trap and fish, repair a screen or leaking faucet, butcher and store big game, kill, relieve allergy symptoms, control insects, stay safe during storms and floods, can and freeze fruits and vegetables, take your own blood pressure and much, much more. Praise for a previous edition: How we have survived this long without this book I don't know. The concept is brilliant and simple. If we had lived in a rural community a century ago, much of the knowledge gathered here would have been in our bones. Harper's

Effect of Smart Growth Policies on Travel Demand Maren Outwater, Colin Smith, Jerry Walters, Brian Welch, Robert Cervero, Kara Kockelman, and J. Richard Kuzmyak, This report from the second Strategic Highway Research Program SHRP 2 which is administered by the Transportation Research Board of the National Academies explores the underlying relationships among households, firms, and travel demand. The report also describes a regional scenario planning tool that can be used to evaluate the impacts of various smart growth policies.
