Atoms are so small that many scientists throughout history have created models to describe them.

Why have atomic theories changed over time? Better technology came around.

Scientist	Year	Major Discovery/ Contribution	Name of atomic model
John Dalton	1803	Each element is made up of small, indivisible particles called atoms. Different elements have atoms of different masses.	Billiard Ball Model
J.J. Thomson	1897	Negatively charged electron	Plum Pudding Model
Niels Bohr	1913	Electrons move <u>fixed orbits</u> around the atom's nucleus in specific layers, or <u>electron shells</u> . Atoms absorb or give off energy when the electrons move from one shell (<u>energy level</u>) to another.	Bohr Model
Ernest Rutherford	1909	1909 /Based on idea that positive reflects positive/ atom mostly empty space; electrons orbit randomly around positively charged nucleus	Planetary Model

Collateral Damage Sharon L. Nichols,David C. Berliner,2007-03-01 Drawing on their extensive research Nichols and Berliner document and categorize the ways that high stakes testing threatens the purposes and ideals of the American education system For more than a decade the debate over high stakes testing has dominated the field of education This passionate and provocative book provides a fresh perspective on the issue and powerful ammunition for opponents of high stakes tests Their analysis is grounded in the application of Campbell s Law which posits that the greater the social consequences associated with a quantitative indicator such as test scores the more likely it is that the indicator itself will become corrupted and the more likely it is that the use of the indicator will corrupt the social processes it was intended to monitor Nichols and Berliner illustrate both aspects of this corruption showing how the pressures of high stakes testing erode the validity of test scores and distort the integrity of the education system Their analysis provides a coherent and comprehensive intellectual framework for the wide ranging arguments against high stakes testing while putting a compelling human face on the data marshalled in support of those arguments **Departments of Veterans Affairs and Housing and Urban Development and Independent Agencies Appropriations for Fiscal Year 1993: American Battle Monuments Commission** United States.
