Museum Object Lessons for the Digital Age Haidy Geismar, 2018-05-14 Museum Object Lessons for the Digital Age explores the nature of digital objects in museums asking us to question our assumptions about the material social and political foundations of digital practices Through four wide ranging chapters each focused on a single object a box pen effigy and cloak this short accessible book explores the legacies of earlier museum practices of collection older forms of media from dioramas to photography and theories of how knowledge is produced in museums on a wide range of digital projects Swooping from Ethnographic to Decorative Arts Collections from the Google Art Project to bespoke digital experiments Haidy Geismar explores the object lessons contained in digital form and asks what they can tell us about both the past and the future Drawing on the author s extensive experience working with collections across the world Geismar argues for an understanding of digital media as material rather than immaterial and advocates for a more nuanced ethnographic and historicised view of museum digitisation projects than those usually adopted in the celebratory accounts of new media in museums By locating the digital as part of a longer history of material engagements transformations and processes of translation this book broadens our understanding of the reality effects that digital technologies create and of how digital media can be mobilised in different parts of the world to very different effects

Meyer, Shareen Blair Brysac, 2025-06-25 Thanks to Salem sea captains Gilded Age millionaires curators on horseback and missionaries gone native North American museums now possess the greatest collections of Chinese art outside of East Asia itself How did it happen The China Collectors is the first full account of a century long treasure hunt in China from the Opium Wars and the Boxer Rebellion to Mao Zedong s 1949 ascent

The principal gatherers are mostly little known and defy invention. They included foreign devils who braved desert sandstorms, bandits and local warlords in acquiring significant works. Adventurous curators like Langdon Warner, a forebear of Indiana Jones, argued that the caves of Dunhuang were already threatened by vandals, thereby justifying the removal of frescoes and sculptures. Other Americans include George Kates, an alumnus of Harvard Oxford and Hollywood who fell in love with Ming furniture. The Chinese were divided between dealers who profited from the artworks removal and scholars who sought to protect their country's patrimony. Duanfang, the greatest Chinese collector of his era, was beheaded in a coup and his splendid bronzes now adorn major museums. Others in this rich tapestry include Charles Lang Freer, an enlightened Detroit entrepreneur; two generations of Rockefellers; and Avery Brundage, the imperious Olympian. And Arthur Sackler, the grand acquirer. No less important are two museum directors: Cleveland's Sherman Lee and Kansas City's Laurence Sickman, who challenged the East Coast's hegemony. Shareen Blair Brysac and Karl E. Meyer even handedly consider whether ancient treasures were looted or salvaged and whether it was morally acceptable to spirit hitherto inaccessible objects westward where they could be studied and preserved by trained museum personnel. And how should the US and Canada and their museums respond now that China has the means and will to reclaim its missing patrimony.

We are proud to present the DAGM 2002 proceedings which are the result of the efforts of many people. First there are the many authors who have submitted so many excellent contributions. We received more than 140 papers of which we could only accept about half in order not to overload the program. Only about one in seven submitted papers could be delivered as an oral presentation for the same reason. But it needs to be said that almost all submissions were of a really high quality. This strong program could not have been put together without the support of the Program Committee. They took their responsibility most seriously and we are very grateful for their reviewing work which certainly took more time than anticipated given the larger than usual number of submissions. Our three invited speakers added a strong multidisciplinary component to the conference. Dr Antonio Criminisi of Microsoft Research, Redmond, USA, demonstrated how computer vision can literally bring a new dimension to the appreciation of art. Prof. Philippe Schyns, Dept. of Psychology, Univ. of Glasgow, UK.
