
Introduction

1.1 Scope of the document

This section will cover details regarding scope of the document

Sample Content:

This document outlines the high level functional design of tax payer registration functionality. It highlights/refers the high level flows / Use cases in registration process, design of components, along with the rationale for the same. It serves as an input to the low level design documents that would further elaborate on the application design.

1.2 Intended Audience

- *This section will cover categories of audiences who will be referring/reviewing this document*

Sample Content:

- *Web portal Development Team*
- *Architecture Team*
- *Quality Team*
- *Department*

1.3 System overview

- *This section will capture high level overview of system application i.e. for what system is being developed ,the high level process flow*
- *Who are the stake holders of system*

Sample Content:

This system provides a web interface to the tax payer for filling up registration form and submits his registration request. This system also provides facility to integrate third party application through API so that tax payer can use third party application for registration. In Registration process, tax payer need to complete registration form having some mandatory and optional fields. This system will do the both structural validation and data validation in real time. There will be separate work flow for approval.

System Design

Application Design

This section will capture Process flow, Information flow having sequence diagram for different use cases, component design details, key design considerations taken and API catalogue

Process Flow

This section will capture the flowcharts(s) representing process diagram

Sample Process Flow Chart:

If we take tax payer registration work flow as a sample, Work flow diagram will be as shown in diagram

Web Design & Development Nicolae Sfetcu, A guide for developing web sites by means of conceptualization planning modeling and execution of electronic media delivery via Internet. Web development is a broad term for any activities related to developing a web site for the World Wide Web or an intranet. This can include e commerce business development web design web content development client side server side coding and web server configuration. However among web professionals web development usually refers only to the non design aspects of building web sites e.g writing markup and coding. Web development can range from developing the simplest static single page of plain text to the most complex web based internet applications electronic businesses or social network services. Web design is a process of conceptualization planning modeling and execution of electronic media delivery via Internet in the form of Markup language suitable for interpretation by Web browser and display as Graphical user interface GUI.

Object Oriented Modeling And Design With UML Ajit Singh, 2019-05-16 The Unified Modeling Language UML is inherently object oriented modeling language and was designed for use in object oriented software applications. The applications could be based on the object oriented technologies recommended by the Object Management Group OMG which owns the UML. The initial versions of UML UML 1.x were based on three leading object oriented methods Booch OMT and OOSE to represent the culmination of best practices in practical object oriented modeling. UML 2.x is still object oriented in its core though there were some apparently unsuccessful attempts to extend UML to support other development methods. This book provides practical guidance on the modeling and design of object oriented systems. Its specific goals are the following: To provide a sound understanding of the fundamental concepts and historical evolution of the object model. To facilitate a mastery of the notation and process of object oriented modelling and design. To teach the realistic application of object oriented modelling and design within a variety of problem domains. The concepts presented all stand on a solid theoretical foundation but this is primarily a pragmatic book that addresses the practical needs and concerns of software engineering practitioners from the architect to the software developer.

Internet Applications in Product Design and Manufacturing George Q. Huang, K.L. Mak, 2012-12-06 In recent years the importance of Internet and World Wide Web WWW technologies in manufacturing industries has been rising very rapidly in a global context the impact of which is deemed most profound ever since the Industrial Revolution. The waning interests in the electronic commerce and

electronic business e commerce e business have spread from the heartland product development to the battlefield shop floor of manufacturing enterprises The number of web applications is ever on the rise and many practitioners are keen on trying these remote systems through web browsers to support their decision making activities Indeed product design and manufacture professionals will soon be able to benefit from such remote services and supports commercially available on the Internet The practice and performance of product development and realization are expected to make immense progress Web applications in product design and manufacture signals the beginning of a new era of the digital manufacturing enterprise However many loopholes are found in the development and application processes because of domain complexity and technology sophistication thus generating new challenges to both the developers and practitioners A simple example is the difference in the user interfaces between web applications and traditional applications Indeed abundant issues need to be resolved before the full launch of digital manufacturing can come into being
