IBM i2 Integrated Law Enforcement: Technical Architecture and Deployment Guide Wil Jamison, John Dowling, IBM Redbooks, 2014-11-17 IBM i2 Integrated Law Enforcement is an IBM Smarter Cities solution that addresses the needs of modern day law enforcement agencies. It is a solution framework that provides the individual capabilities of the products that comprise the solution and extended capabilities developed through the synergistic integration of those product components. As a framework, IBM i2 Integrated Law Enforcement allows for the continuous expansion of capabilities by putting together building blocks within the system and integrating with new external systems. In doing so, an organization can respond and adapt to its changing needs. Simply stated, the configuration, integration, and implementation of IBM i2 Integrated Law Enforcement and its components provide the tools for more effective law enforcement. This IBM Redpaper™ publication explains the technology and the architecture on which the solution is built. Most importantly, this paper enables technical teams to install, configure, and deploy an instance of the i2 Integrated Law Enforcement solution using the product i2 Intelligent Law Enforcement V1.0.1. This paper is targeted to solution architects, system and deployment engineers, security specialists, data management experts, system analysts, software developers, and test engineers and system administrators. Readers of this paper will benefit from the IBM Redguide™ publication *Integrated Law Enforcement: A Holistic Approach to Solving Crime* REDP 5116. *Cloud Services, Networking, and Management* Nelson L. S. da Fonseca, Raouf Boutaba, 2015-03-31 *Cloud Services, Networking, and Management* provides a comprehensive overview of the cloud infrastructure and services as well as their underlying management mechanisms, including data center virtualization and networking, cloud security, and reliability. Big data analytics, scientific, and commercial applications. Special features of the book include state-of-the-art content, self-contained chapters for readers with specific interests, and includes commercial applications on cloud video services and games. **Cisco NAC Appliance** Jamey Heary, Jerry Lin, Chad Sullivan, Alok Agrawal, 2007-08-06 Cisco NAC Appliance Enforcing Host Security with Clean Access. Authenticate, inspect, remediate, and authorize end-point devices using Cisco NAC Appliance. Jamey Heary, CCIE No. 7680, Contributing authors: Jerry Lin, CCIE No. 6469, Chad Sullivan, CCIE No. 6493, and Alok Agrawal. With today's security challenges and threats growing more sophisticated, perimeter defense alone is no longer sufficient. Few organizations are closed entities with well-defined security perimeters, which has led to the creation of perimeterless networks with ubiquitous access. Organizations need to have internal security systems that are more comprehensive, pervasive, and tightly integrated than in the past. Cisco Network Admission Control (NAC) Appliance, formerly known as Cisco Clean Access, provides a powerful host security policy inspection, enforcement, and remediation solution that is designed to meet these new challenges. Cisco NAC Appliance allows you to enforce host security policies on all hosts managed and unmanaged as they enter the interior of the network, regardless of their access method, ownership, device type, application set, or operating system. Cisco NAC Appliance provides proactive

protection at the network entry point Cisco NAC Appliance provides you with all the information needed to understand design configure deploy and troubleshoot the Cisco NAC Appliance solution You will learn about all aspects of the NAC Appliance solution including configuration and best practices for design implementation troubleshooting and creating a host security policy Jamey Heary CCIE No 7680 is a security consulting systems engineer at Cisco where he works with its largest customers in the northwest United States Jamey joined Cisco in 2000 and currently leads its Western Security Asset team and is a field advisor for its U S Security Virtual team His areas of expertise include network and host security design and implementation security regulatory compliance and routing and switching His other certifications include CISSP CCSP and Microsoft MCSE He is also a Certified HIPAA Security Professional He has been working in the IT field for 13 years and in IT security for 9 years Understand why network attacks and intellectual property losses can originate from internal network hosts Examine different NAC Appliance design options Build host security policies and assign the appropriate network access privileges for various user roles Streamline the enforcement of existing security policies with the concrete measures NAC Appliance can provide Set up and configure the NAC Appliance solution Learn best practices for the deployment of NAC Appliance Monitor maintain and troubleshoot the Cisco NAC Appliance solution This security book is part of the Cisco Press Networking Technology Series Security titles from Cisco Press help networking professionals secure critical data and resources prevent and mitigate network attacks and build end to end self defending networks Category Cisco Press Security Covers End Point Security

Informatics Implementation Guide Eleanor Callahan Hunt, Sara Breckenridge Sproat, Rebecca Rutherford Kitzmiller, 2013-03-09 Health institutions are investing in and fielding information technology solutions at an unprecedented pace With the recommendations from the Institute of Medicine around information technology solutions for patient safety mandates from industry groups such as Leapfrog about using information systems to improve health care and the move toward evidence based practice health institutions cannot afford to retain manual practices The installation of multi million dollar computerized health systems represents the very life blood of contemporary clinical operations and a crucial link to the financial viability of institutions Yet the implementation of health information systems is exceptionally complex expensive and often just plain messy The need for improvement in the art and science of systems implementation is clear up to 70 80% of information technology installations fail The reasons are multifaceted ranging from the complexity of the diverse workflows being computerized the intricate nature of health organizations the knowledge and skills of users to other reasons such as strategies for obtaining key executive support weaving through the politics peculiar to the institution and technical facets including the usability of systems Thus the art and science of successfully implementing systems remains deeply layered in elusiveness Still given the pervasiveness of system implementations and the importance of the outcomes this is a critical topic especially for nurses and informatics nurse specialists **Rational Application Developer V7 Programming**

Engineering and Product Development Management Stephen Armstrong, 2001-09-24 Engineering and Product Development Management is a practical guide to the components of engineering management using a holistic approach It will help engineers and managers understand what they have to do to improve the product development process by deploying new technology and new methods of working in concurrent teams The book takes elements from six well known and understood bodies of knowledge and integrates them into a holistic approach integrated product development project management process management systems engineering product data management and organizational change management These elements are framed within an overall enterprise wide architecture The techniques discussed in this book work for both huge multinational organizations and smaller enterprises

The emphasis throughout is on practical tools which will be invaluable for engineers managers and consultants responsible for project and product development Cloud Computing and Big Data C. Catlett,W. Gentzsch,L. Grandinetti,2013-10-22 Cloud computing offers many advantages to researchers and engineers who need access to high performance computing facilities for solving particular compute intensive and or large scale problems but whose overall high performance computing HPC needs do not justify the acquisition and operation of dedicated HPC facilities There are however a number of fundamental problems which must be addressed such as the limitations imposed by accessibility security and communication speed before these advantages can be exploited to the full This book presents 14 contributions selected from the International Research Workshop on Advanced High Performance Computing Systems held in Cetraro Italy in June 2012 The papers are arranged in three chapters Chapter 1 includes five papers on cloud infrastructures while Chapter 2 discusses cloud applications The third chapter in the book deals with big data which is nothing new large scientific organizations have been collecting large amounts of data for decades but what is new is that the focus has now broadened to include sectors such as business analytics financial analyses Internet service providers oil and gas medicine automotive and a host of others This book will be of interest to all those whose work involves them with aspects of cloud computing and big data applications
