Activity #16: Is It Really There?

Apparatus: Semi-transparent Glass, 2 Torchlights, Screen

- Procedure:**
- In this activity, you will use the semi-transparent glass as a mirror.
 - Place the torchlight about 150 cm away from the front of the semi-transparent glass. Turn it on and observe the whole reflection of the torchlight in the glass.
 - Turn the second torchlight (switched-off) and place it behind the glass. While observing the original image from the front of the glass, adjust the second torchlight such that it overlaps the image of the first torchlight which is reflected in.
 - Measure the perpendicular distance of both torchlights from the glass.
 - Remove the second torchlight and place the screen behind the glass. Try to adjust the position of the screen so that it captures an image of the torchlight on the screen. Is this possible?
