Critical Questions in STEM Education Valarie L. Akerson, Gayle A. Buck, 2020-11-05 This edited volume offers a crosscutting view of STEM and is comprised of work by scholars in science technology engineering and mathematics education It offers a view of STEM from the disciplines that comprise it while adhering to the idea that STEM itself is an interdisciplinary treatment of all the associated disciplines in a meaningful way This book raises and answers questions regarding the meaning of STEM education and research This volume is divided into three sections the first one describes the nature of the component disciplines of STEM The next section presents work from leaders representing all STEM disciplines and deals with aspects such as K 12 and post secondary education The last section draws conclusions regarding the natures of the disciplines challenges and advantages of STEM education in terms of theoretical and practical implications The two final chapters compile arguments from the research chapters describing themes in research results and

making recommendations for best STEM education practice and examining areas for future research in STEM education

Innovative Technologies and Learning Yueh-Min Huang, Chin-Feng Lai, Tânia Rocha, 2021-11-23 This book constitutes the refereed proceedings of the 4th International Conference on Innovative Technologies and Learning ICITL 2021 held in November-December 2021. Due to COVID-19 pandemic the conference was held virtually. The 59 full papers presented together with 2 short papers were carefully reviewed and selected from 110 submissions. The papers are organized in the following topical sections: Artificial Intelligence in Education, Augmented Virtual and Mixed Reality in Education, Computational Thinking in Education, Design Framework and Model for Innovative Learning, Education Practice Issues and Trends, Educational Gamification and Game based Learning, Innovative Technologies and Pedagogies Enhanced Learning, Multimedia Technology Enhanced Learning, Online Course and Web Based Environment and Science Technology Engineering Arts and Design and Mathematics. **Concepts and Practices of STEM Education in Asia** May Hung Cheng, Cathy Bunting, Alister Jones, 2022-10-20

The purpose of this edited book is to enrich the literature related to STEM education at kindergarten, primary and secondary levels in Asia, with particular attention given to the analysis of the educational context in a number of Asian countries, including STEM related policies, pedagogical practices and the design and evaluation of STEM programmes. The discussions look into impacts on student learning outcomes and the ways in which STEM education is catering for schools and students' interests and needs. The contributors are experts in STEM education or are leading major research and development projects in STEM in their regions. The book's first section is focused at the macro level on the conceptualization and formulation of STEM education policies in different regions, contributing to our understanding of the current status of STEM education in Asia. The second section examines some features of STEM learning and teaching at the classroom level and includes studies on student learning in STEM programmes. Pedagogical innovations implemented in different parts of Asia are also reported and discussed. The third section moves to teacher education and teacher professional development. It discusses practices of teacher professional development in the region and reports on current provisions as well as challenges. Together, the contributions from different Asian regions invite researchers and educators to learn from effective STEM practices and point out areas for further development. Chapters 'An Overview of STEM Education in Asia' and 'STEM Teacher Professional Development for Primary School Teachers in Hong Kong' are available open access under a CC BY 4.0 license at link.springer.com. **The Popular Science Monthly**, 1918 Selected Water Resources Abstracts, 1988
