

## Unit 5: Classification

### Study Guide Answers

STL1: Obtain, evaluate, and communicate information to investigate the diversity of living organisms and how they can be compared scientifically.

**Vocabulary:** Complete the following chart using the definitions obtained in class.

| Word                  | Definition                                                                                                         |
|-----------------------|--------------------------------------------------------------------------------------------------------------------|
| Species               | A group of organisms with similar characteristics who are able to breed and produce a fertile offspring            |
| Diversity             | Variation of living things present in a particular ecosystem                                                       |
| Taxonomy              | The branch of science that deals with classification of organisms                                                  |
| Scientific Name       | A name used by scientists that consists of a genus and species                                                     |
| Dichotomous Key       | A chart used to identify organisms based on a series of choices                                                    |
| Classification        | Sorting something according to similar characteristics; another term for taxonomy                                  |
| Kingdom               | The most broad level of classification; made up of smaller groups called phylum                                    |
| Binomial Nomenclature | A two name system with the first name referring to genus and the second name referring to species; scientific name |
| Carolus Linnaeus      | The "father" of taxonomy; created the binomial nomenclature                                                        |
| Genus                 | A classification grouping, the first part of the scientific name                                                   |

- The language used for scientific name is
  - Latin
- When constructing a dichotomous key, which characteristics do you look for?
  - You look for physical characteristics.
- Compare and contrast animals and plants
  - Animals: multicellular, autotrophs, cannot move, eukaryotic
  - Plants: Multicellular, heterotrophs, can move, eukaryotic
- Sponges look much like plants, but are classified as animals. Why is this?
  - Sponges are heterotrophic (consume food) and not autotrophs like plants
- List the levels of hierarchy from largest to smallest.
  - Domain → Kingdom → Phylum → Class → Order → Family → Genus → Species  
Remember the mnemonic device: "Do Keep Ponds Clean Or Frogs Get Sick!"

ANSWERS TO THE "MAKE YOUR OWN" DICHOTOMOUS KEY WILL VARY!
