McGrane,2010 **How to Enhance Learning Efficiency When Online Learning is Popular and Indispensable:**

Theory, Research and Practice Rong Lian,Chang Liu ,Juzhe Xi,2024-07-17 Online learning has become more and more common globally whether for comfort adapting to work hours or just having the freedom to study from anywhere And now under the coronavirus pandemic as people are having to stay at home it has become more important than ever Although the popularity of wireless network and portable smart device makes it possible for people to acquire and learn knowledge anytime and anywhere it does not necessarily mean an increased learning performance Relevant research in cognitive science has revealed possible limitations in online learning For example the knowledge acquired through online learning tends to be fragmented and lacks guidance for integrated thinking among different subjects which makes it difficult for learners to form a systematic knowledge structure Learners may experience cognitive overload metacognitive illusion and low learning efficiency in self regulated learning It follows that in the post COVID 19 era online learning puts forward new requirements and challenges to the contemporary students not only to their learning strategies but positive character traits in learning Most of the current learning theories were developed in the early 20th century and may not fit in well with the current situation then possibly leading to inefficient learning and increased learning burden Therefore it is necessary and important to reexplore the influencing factors and mechanisms that affect the learning efficiency of students at all levels nowadays based on which we could construct a theoretical model of efficient learning model School Didactics And Learning Michael Uljens,2004-08-02 This text presents a reflective theory of school didactics incorporating German and Nordic research traditions in the theory of didactics together with Anglo American research on teaching instructional

research and cognitivist theory *System-Theoretical Urban Development* Manfred Rolfes, Jan Lorenz Wilhelm, 2024-02-26
In their book the authors introduce the topic of urban development from a systems theoretical perspective and provide explanatory approaches tips and methodological instructions for dealing with urban complexity Knowing full well that this sometimes amounts to squaring the circle the authors draw on applied systemic approaches and systematically couple these with epistemological currents that can be assigned to Luhmann's systems theory The social understanding of this theory of social systems represents a very good starting point for understanding urban development and urban complexity From this perspective urban development can be seen as a process in which organisations and individuals with their own expectations and perspectives are involved in which contradictions and conflicts seem inevitable and the future cannot be clearly predicted Decisions in cities and municipalities are therefore always associated with risks irritations and unexpected consequences With the Potsdam lodestar approach Rolfes and Wilhelm present a multidimensional approach to managing urban development processes The approach distinguishes five process dimensions which are presented chapter by chapter and linked with recommendations The individual chapters are structured along guiding questions and feature appealing visualizations and numerous bonus materials **Teaching with Technologies in Nursing and the Health Professions**
