**Station 1:** Shine your light beam through the glass block at an angle. Draw what you can see in the box below. Make sure you label the normal, the angle of incidence and angle of refraction.

Q1) When the light ray entered the transparent block did it move closer to the normal or away from the normal?

.....

Q2) When the light ray left the transparent block did it move closer to the normal or away from the normal?

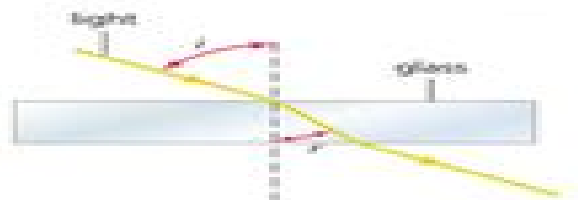

.....

**Extra challenge:** Explain why this happened using the word density.

.....

.....

**Station 2:** For each angle of incidence measure the angle of refraction.

| Angle of incidence [i] | Angle of refraction [r] |
|------------------------|-------------------------|
| 15°                    |                         |
| 30°                    |                         |
| 60°                    |                         |
