NASHERJ. ,2004-07 Social Science Quotations Robert Merton,2018-04-27 Social Science Quotations has been prepared to meet an evident unmet need in the literature of the social sciences Writings on the lives and theories of individual social scientists abound but there has been no fully documented collection of memorable quotations from the social sciences as a whole The frequent use of quotations in scientific as well as literary writings that are mere summaries or paraphrases typically fail to capture the full force of formulations that have made quotations memorable This book of quotations invites the further reading or rereading of the original texts beyond the quotations themselves Sills and Merton draw extensively upon the writings that constitute the historical core of the social sciences and social thought those works with staying power often described as the classical texts Many quotations have been drawn from these classical texts because the quotations contain memorable ideas memorably expressed Both consequential and memorable these words have been quoted over the generations entering into the collective memory of social scientists everywhere and at times diffusing into popular thought and into the vernacular as well This book is useful to social scientists anthropologists economists historians political scientists psychiatrists psychologists sociologists and statisticians and for all who want to learn or verify memorable formulations and phrases concerning social thought and social theories It is particularly useful for graduate students taking courses that examine the history of their discipline Soviet Power Reactors, 1974 United States. Nuclear Power Reactor Delegation to the USSR.,1975 **Soviet Power Reactors--1974** United States. Energy Research and Development Administration. Division of Reactor Research and Development,1975 **ERDA.** ,1975 **Energy Research Abstracts** ,1993 **The Engineer** ,1912 **The Cambridge Review** ,1881 *Computational Fluid Dynamics Review 1998 (In 2 Volumes)* Mohamed M Hafez,Koichhi Oshima,1998-11-20 The first volume of CFD Review was published in 1995 The purpose of this new publication is to present comprehensive surveys and review articles which provide up to date information about recent progress in computational fluid dynamics on a regular basis Because of the multidisciplinary nature of CFD it is difficult to cope with all the important developments in related areas There are at least ten regular international conferences dealing with different aspects of CFD It is a real challenge to keep up with all these activities and to be aware of essential and fundamental contributions in these areas It is hoped that CFD Review will help in this regard by covering the state of the art in this field The present book contains sixty two articles written by authors from the US Europe Japan and China covering the main aspects of CFD There are five sections general topics numerical methods flow physics interdisciplinary applications parallel computation and flow visualization The section on numerical methods includes grids schemes and solvers while that on flow physics includes incompressible and compressible flows hypersonics and gas kinetics as well as transition and turbulence This book should be useful to all researchers in this fast developing field
