

Population Distributions

How does population distribution affect the outcome?

Why?

Alaska encompasses 37 million acres of unoccupied forest land, it is the largest state in the United States, yet with a population of under 700,000 people votes that carry much weight in Senate, House, and Supreme Court elections relative to states with a population of nearly 7 million. How does the distribution of the 40,000,000 total land acres are represented in the election? What are the reasons that this single popular vote represents the entire state and what effect does this representation have on the outcome?
