Programmable Thermostat Owners Manual Model: RS3110 Series

Congratulations!

About new thermostat will provide years of reliable service. By saving energy, your thermostat will pay for itself during its first season of use. Thank you for buying our product! Please read this manual for complete instructions on installing and operating your thermostat. If you require further assistance, please feel free to contact us.

IMPORTANT INFORMATION

1. This thermostat is designed to work on the following systems:

- Gas - Standing Pilot
- Gas - Electronic Ignition
- Gas - Fired Boilers
- Gas - Milivolt Systems
- Oil - Fired Boilers
- Oil - Fired Furnace
- Single Stage Heat Pumps - with no auxiliary heat
- Electric Air Conditioning
- Electric Furnace

This thermostat will NOT control multi-stage heat pumps or 110/220V baseboard electric heating systems.

2. Temperature Range

This thermostat can be programmed between 45°F and 90°F (7°C and 33°C). However, it will display room temperatures from 30°F to 90°F (0°C and 33°C). It will be displayed if the temperature is higher than 90°F (33°C), and 30°F will be displayed if the temperature is lower than 30°F (0°C).

This thermostat will automatically shut down in Heat mode if the temperature rises above 95°F (35°C), and will automatically shut down in Cool mode if the temperature drops below 45°F (7°C).

3. Compressor Protection

After shutting off the cooling system, this thermostat has a 4 minute delay before it can be restarted. This feature will prevent damage to your compressor caused by rapid cycling. It does not prevent a rapid compressor restart due to short power outages.

4. Battery Warning

Two fresh AA alkaline batteries should provide over one year of service. When the batteries need to be replaced, the low battery indicator will flash on the display. When you see this message, install new alkaline batteries. You have approximately 1 minute to change the batteries and keep the thermostat's clock and program settings. Once the batteries have become too low to ensure proper operation, your system will be turned off, and the display will be cleared except for flashing Low Battery Indicator on the LCD display.

CAUTION: When only the Low Battery icon flashes on the display, the thermostat is shut down, and your system will no longer operate. In this condition, there is no temperature control.

NOTE: The backlight will not function when the thermostat is in low battery condition.

NOTE: If you plan to be away from the premises over 30 days, we recommend that you replace the old batteries with new alkaline batteries prior to leaving.
