Develop Your Own Rock Cycle Worksheet **Answer Key**

The rock cycle is the idea that the three main types of rock (sedimentary, metamorphic and igneous) undergo physical changes enabling each to change into any of the others. In other words, sedimentary can become metamorphic and/or igneous. Igneous can become sedimentary and/or metamorphic, and so forth.

The bullets below provide information on how each type of rock is formed.

- Any type of rock that undergoes heat and/or pressure can become *metamorphic* rock.
- Any type of rock that undergoes weathering and erosion turns into **sediment**.
- Any **sediment** that compacts or cements together can become *sedimentary* rock.
- *Igneous* rock is formed from cooling **magma**.
- **Magma** is formed from melting of *sedimentary*, *igneous* and *metamorphic* rock.

Using the above information, draw your own diagram to model the rock cycle. Your model should have five main categories – one for each of the types of rock and one for each of the intermediate stages (sediment and magma). **Below is an example of the rock cycle. Forms of solutions may vary, but content should be the same.**

Differentiating Instruction with Menus Laurie E. Westphal, 2007 Differentiating Instruction With Menus offers teachers everything they need to create a student-centered learning environment based on choice. Addressing the four main subject areas: language arts, math, science, and social studies, and the major concepts taught within these areas, these books provide a number of different types of menus that elementary-aged students can use to select exciting products that they will develop so teachers can assess what has been learned instead of using a traditional worksheet format. Each book contains attractive, reproducible menus, each based on the levels of Bloom's revised taxonomy for students to use to guide them in making decisions as to which products they will develop after studying a major concept or unit. Using creative and challenging choices found in Tic Tac Toe Menus, List Menus, 2-5-8 Menus, Baseball Menus, and Game Show Menus, students will look forward to sharing their newfound knowledge throughout the year. Also included are specific guidelines for products, rubrics for assessing student products, and teacher introduction pages for each menu. This book includes menus that teach students about physical science, earth science, and scientists and the tools they use. **25 Content-Area Lessons, Level 4** Stephanie Paris, Christine Dugan, 2011-06 Integrate academic vocabulary instruction into content area lessons with this engaging new resource for Level 4, which provides teachers with 12 easy-to-implement strategies for teaching academic vocabulary.
