improves life for others and if we consider a person's entire life a disability of some kind will affect almost everybody at some point. This book *Assistive Technology Shaping a Sustainable and Inclusive World* presents the proceedings of AAATE 2023, the 17th International Conference of the Association for the Advancement of Assistive Technology in Europe, held in Aubervilliers, France, from 30 August to 1 September 2023. For over 30 years, the biennial AAATE conference has focused on research aimed at improving the lives of people with a disability and has become one of the main platforms for all stakeholders in the field. A total of 123 papers were submitted in the category intended for publication in these conference proceedings, and after a rigorous process involving review by at least three international reviewers, 74 were selected for inclusion here. Topics covered include service delivery of AT for various groups such as older adults, children, and those with cognitive disabilities; mobility, privacy, and security issues; and AT to promote inclusion and facilitate participation in education, culture, and work. Providing a comprehensive and current overview, the book will be of interest to researchers, practitioners, manufacturers, decision makers, and providers, users of AT, and anyone else working in the field.

What Went Right Roberta Israeloff, George McDermott, 2017-05-24. In *What Went Right: Lessons from Both Sides of the Teacher's Desk*, co-authors Roberta Israeloff and George McDermott resume a conversation they began in 1967 when she was in eleventh grade at Syosset N.Y. High School and he was her English teacher. In 2014, after finding each other on Facebook, they began an email correspondence as contemporaries rather than student and teacher and quickly discovered that neither had ever stopped thinking about that school and the many ways it influenced them. As they shared their impressions of how and why public education has changed since then, they realized that a single academic year can have a deeper and longer lasting impact than they had ever imagined. Personal and probing, evocative and wide-ranging, the letters that compose this book ask and attempt to answer some timeless and timely questions: What makes a teacher or a class memorable? How can the teacher-student relationship be supported and strengthened? What does being educated truly mean? And perhaps most important, what role can free public education play in sustaining our democracy?

The Shallows Nicholas Carr, 2011-06-06 Finalist for the 2011 Pulitzer Prize in General Nonfiction Nicholas Carr has written a Silent Spring for the literary mind Michael Agger Slate Is Google making us stupid When Nicholas Carr posed that question in a celebrated Atlantic Monthly cover story he tapped into a well of anxiety about how the Internet is changing us He also crystallized one of the most important debates of our time As we enjoy the Net s bounties are we sacrificing our ability to read and think deeply Now Carr expands his argument into the most compelling exploration of the Internet s intellectual and cultural consequences yet published As he describes how human thought has been shaped through the centuries by tools of the mind from the alphabet to maps to the printing press the clock and the computer Carr interweaves a fascinating account of recent discoveries in neuroscience by such pioneers as Michael Merzenich and Eric Kandel Our brains the historical and scientific evidence reveals change in response to our experiences The technologies we use to find store and share information can literally reroute our neural pathways Building on the insights of thinkers from Plato to McLuhan Carr makes a convincing case that every information technology carries an intellectual ethic a set of assumptions about the nature of knowledge and intelligence He explains how the printed book served to focus our attention promoting deep and creative thought In stark contrast the Internet encourages the rapid distracted sampling of small bits of information from many sources Its ethic is that of the industrialist an ethic of speed and efficiency of optimized production and consumption and now the Net is remaking us in its own image We are becoming ever more adept at scanning and skimming but what we are losing is our capacity for concentration contemplation and reflection Part intellectual history part popular science and part cultural criticism The Shallows sparkles with memorable vignettes Friedrich Nietzsche wrestling with a typewriter Sigmund Freud dissecting the brains of sea creatures Nathaniel Hawthorne contemplating the thunderous approach of a steam locomotive even as it plumbs profound questions about the
