Matters of Telling: The Impulse of the Story Carlo Comanducci, Alex Wilkinson, 2018-11-26 In this book multiple authors and perspectives converge on the materiality of storytelling in order to

court its potentialities and flesh out its tensions Reflecting through its methodological multiplicity not only the vast array of discourses and disciplines that concern themselves with the study of narration but also the various and variable subjects of the act of telling the collective effort of this volume is less to map or track than to amplify the possibilities of contingent situations embodied relations and specific texts in which beyond the tale the telling itself speaks and matters The Mentality of Partisans of the Polish Anti-Communist Underground 1944-1956 Mariusz Mazur,2022-10-30 This book is the first study of the mentality of anti Communist underground fighters and presents especially their thinking ideals stereotypes and customs The models and psychological processes that the volume analyses are relevant not only to the Polish partisans but also to members of other underground organisations in East Central Europe South America and Asia It explores how the underground organizations were created who joined them and why what thoughts and emotions were involved and what were the consequences of the decisions to join them Experiences and situations are illustrated with excerpts of diaries and memoirs which reveal the thinking of people in extreme situations when their lives are in danger when they are caught in desperate conflicts or are fighting against overwhelming government forces The Mentality of Partisans is useful for upper level undergraduates postgraduates and scholars interested in the history of Europe resistance movements anticommunism military and political conflicts World War Two and non classical historiography **Violence** Alex Alvarez,Ronnet D. The Hand of Compassion Kristen Renwick Monroe, 2013-10-31 A fascinating treatise on moral psychology in depth interviews with five people who risked their lives to rescue Jews during World War II Publishers Weekly Through moving interviews with five ordinary people who rescued Jews during the Holocaust Kristen Monroe casts new light on a question at the heart of ethics Why do people risk their lives for strangers and what drives such moral choice Monroe's analysis points not to traditional explanations such as religion or reason but to identity The rescuers' perceptions of themselves in relation to others made their extraordinary acts spontaneous and left the rescuers no choice but to act To turn away Jews was for them literally unimaginable In the words of one German-Czech rescuer The hand of compassion was faster than the calculus of reason At the heart of this unusual book are interviews with the rescuers complex human beings from all parts of the Third Reich and all walks of life Margot a wealthy German who saved Jews while in exile in Holland Otto a German living in Prague who saved more than 100 Jews and provides surprising information about the plot to kill Hitler John a Dutchman on the Gestapo's Most Wanted List Irene a Polish student who hid eighteen Jews in the home of the German major for whom she was keeping house and Knud a Danish wartime policeman who took part in the extraordinary rescue of 85 percent of his country's Jews Monroe's analysis of these stories is a dramatic illumination of the power of identity to shape our most basic political acts including our treatment of others

American Book Publishing Record, 2003 Pictorial Law Volker Boehme-Neßler, 2010-10-07 We live in a digital Media Society in which pictures are becoming more and more important So human communication is increasingly becoming a visual communication That is not a new finding But the new question is What does this development mean for the law Up to now the law is the part of the society which is most sceptical towards images Law has still resisted the visual temptation This will not last for ever The rush of pictures in everyday life and in every part of the society is much too strong and it is even getting stronger The invasion of images will change the character of modern law deeply Modern law

will become a Pictorial Law What are the chances and the risks of Pictorial Law and visual law communication This is the topic of the book **Why "Good Kids" Turn into Deadly Terrorists** Alice LoCicero, 2014-07-29 Using psychological theory and the author's direct experience working with at risk youth this book answers the questions on the minds of anyone shocked and appalled by the events of the Boston Marathon bombings The shock of the 2013 Boston Marathon bombings was soon followed by a revelation initially disturbing and mystifying two apparently unremarkable brothers one a teenager the other a young adult both well liked immigrants and longtime U S residents had allegedly triggered the bombs Why were these two seemingly normal individuals driven to commit such acts of coldblooded violence This book examines not only the lives motivations and key influences of these infamous brothers but those of other young unexpected terrorists worldwide comparing factors that contributed to their decisions to become terrorists and identifying methods used to recruit them into that deadly fold The chapters teach readers warning signs that youths are being drawn in to terrorism and serve to spur meaningful conversations among citizens politicians and policymakers about what we can do to prevent such recruitment of youths and young adults including other U S residents who might consider emulating the Tsarnaev brothers The book also addresses larger related questions such as whether humans are naturally violent who benefits when young individuals engage in terrorism and why minors are recruited to become killers **Peace, Politics, and Religion** Jeffrey

Haynes, 2020-12-14 Relationships between peace politics and religion are often controversial and sometimes problematic Religion is a core source of identity for billions of people around the world and it is hardly surprising that sometimes it becomes involved in conflicts At the same time we can see religion involved not only in conflict It is also central to conflict resolution peace making and peacebuilding Religious involvement is often necessary to try to end hatred and differences frequently central to political conflicts especially but not only in the Global South Evidence shows that religious leaders and faith based organisations can play constructive roles in helping to end violence and in some cases build peace via early warnings of conflict good offices once conflict has erupted as well as advocacy mediation and reconciliation The chapters of this book highlight that religion can encourage both conflict and peace through the activities of people individually and collectively imbued with religious ideas and ideals **Developing Multicultural Educators** Jana Noel, 2008-02-25

Thoroughly updated Noels concise practical text offers essential information on identity development as it applies to multicultural education Discussions are not heavily laden with theory but when that coverage is warranted Noel uses clear jargon free language and examples of how theory can be applied in the real world The concepts of identity and culture are introduced through the authors own identity story an apt way to set the stage for self exploration learning new insights and discovering how teachers can make a positive difference in school and community settings A section on community funds of knowledge explores the theory and practice of connecting with a schools neighborhood community Other distinctive features include an extended section on tracking and an entirely new section and reflective writing on the concept of subtractive

schooling current statistics and identity issues related to refugee and immigrant status a discussion of Gardner's eighth intelligence the naturalist intelligence and new identity stories illustrating the various stages of ethnic identity The book's advantageous pedagogical tools group and individual activities guided discussion questions throughout the chapters end of the chapter reflective writings and case studies help readers to gain a clear vision of how to be an effective teacher in today's diverse communities

The American Drug Culture Thomas S. Weinberg, Gerhard Falk, Ursula Adler Falk, 2017-12-14 The American Drug Culture uses sociological and other perspectives to examine drug and alcohol use in U.S. society The text is arranged topically rather than by drug categories and explores diverse aspects of drug use including popular culture sexuality legal and criminal justice systems other social institutions and mental and physical health It covers alcohol the most widely used drug in the United States more extensively than other texts on this subject The authors include case studies from their own field research that give students empathetic insights into the situations of those suffering from substance and alcohol abuse

Why we need a revolution in the Social sciences: A post-colonial perspective Sujay Rao Mandavilli, 2024-05-11 We began our work in earnest in the year 2005 November 14th 2005 to be precise when children's day is celebrated all over India in commemoration of the birthday of Pandit Jawaharlal Nehru the first Prime Minister of India The underlying philosophy of our work however stretches back to the early 1990s even the mid 1980s when we faced a great deal of cognitive dissonance in many of our endeavours and daily walks of life due to a constant exposure to and a bombardment by a large number of philosophies and ideas from different sources both human and non human In the year 2005 particularly after the aforesaid date we had reached out to several leading lights and luminaries in the fields of science religion philosophy and spirituality with a great deal of hope to meaningfully engage with them and elicit their own pet theories proposals and viewpoints on various issues and topics We had hoped that this would also help us in our own voyage and journey of discovery The results were indeed startling there was a wide variation in viewpoints based on the scholar in question's own religious linguistic and nationalistic affiliation and loyalties Therefore the age of ideology has still not formally or conceptually ended ending this can change many fundamental equations at a grassroots level and can make life better for all of us living in different parts of the world As a matter of fact Eurocentric biases in various fields of the social sciences has only served to throw up counter reactions and exacerbate ideological differences Intellectualism is also still weak in general particularly in developing countries particularly owing to the following factors
