

CPSC Publishes Final Rules for Nursing Pillows

Registration and Certification

In 2023, the U.S. Consumer Product Safety Commission (CPSC) – Further to its 1992 “Infant Pillow Ban” (16 CFR 1500.18(a)(16)) on certain types of hazardous “infant pillows” that contain loose filled granular materials that conform to an infant’s face or body – issued a notice of proposed rulemaking (NPR) under section 104 of the Consumer Product Safety Improvement Act of 2008 (CPSIA), for a mandatory consumer product safety standard for nursing pillows (including certain nursing pillows that are exempt from the Infant Pillow Ban, while others, such as pillows with a non-granular fill), to address risks of death and injury associated with these products.

Final Rule for Nursing Pillows

Now in the Federal Register Vol. 89, No. 207 (25 October 2024), CPSC is issuing this final rule establishing a consumer product safety standard for nursing pillows. This final rule is codified as “16 CFR Parts 1112, 1130, and 1242 [CPSC Docket No. 2023–0037] Safety Standard for Nursing Pillows”.

CPSC is also amending its regulations regarding third party conformity assessment bodies, to include the safety standard for nursing pillows in the list of notices of requirements (NORs), along with identifying nursing pillows as a durable infant or toddler product subject to consumer registration requirements.

ASTM F3669-24

This CPSC mandatory standard makes references to ASTM F3669-24 “Standard Consumer Safety Specification for Nursing Pillows” regarding general and performance requirements, etc.

However, there are also portions of the CPSC standard more stringent than the ASTM voluntary standard, as these requirements would further reduce the risk of injury associated with the use of nursing pillows.

Effective Date

This rule will become effective 23 April 2025.

Cheit,2018-07-10 In this highly original and meticulously researched comparison of public and private standards setting Ross

E Cheit questions the old maxim that government set safety standards are too severe while those set by the private sector are too lenient. Identifying the comparative institutional advantages of each arrangement through four paired case studies of grain elevators, woodstoves, aviation fire safety, and gas space heaters, he finds instead that some private standards are surprisingly strict while government is better positioned to survey real world experience and sponsor research likely to improve standards setting. Setting Safety Standards challenges those political scientists who argue that only public institutions can advance the public interest in the controversial field of health and safety. Cheit draws attention to such little known organizations as Underwriters Laboratories and the National Fire Protection Association, private sector alternatives to the government regulation so frequently criticized as time consuming, inflexible, and unreasonable. These organizations, he shows, play a far more significant role in regulation than most federal agencies, even though the standards they develop are widely and often mistakenly assumed to be less concerned with due process than government standards and often unduly lax. This study should be widely read by public policy and regulation experts in both the public and the private sectors as well as by academics in the field.
