

Forming a research project using the scientific method: a research experiment on maple syrup production

By Sarah Lehnert

National Science Foundation Graduate STEM Fellow in K-12 Education

Sugar Creek Watershed K-12 Education Program

The Ohio State University-Ohio Agricultural Research and Development Center

Abstract: The purpose of this activity is to introduce high school freshmen to the scientific method and report writing through the design, implementation, and analysis of a semester-long experiment. The students were responsible for designing a research project on sap production in maple trees beginning with the formation of a research question and ending with a full research report written in standard scientific format.

Grade level: 9th (Botany)

Objectives: 1) Introduce students to the scientific method, 2) give student real-life experience designing and analyzing a research project, 3) use a local resource (woodlot) for place-based learning, and 4) provide students with practice writing a scientific report.

National Standards: Understanding of:

- * Scientific inquiry
- * Natural resources

Ohio Benchmark and Academic Content Standards – Grade 10:

Life Science: D.10

Describe how cells and organisms acquire and release energy (photosynthesis, chemosynthesis, cellular respiration and fermentation).

Life Science: D.11

Explain that living organisms use matter and energy to synthesis a variety of organic molecules (e.g., proteins, carbohydrates, lipids and nucleic acids) and to drive life processes (e.g. growth, reacting to the environment, reproduction and movement).

Scientific Inquiry: A.2

Present scientific findings using clear language, accurate data, appropriate graphs, tables, maps and available technology.

Scientific Method Randall K. Noon,2009-04-27 Most failure or accident investigations begin at the end of the story after the explosion after the fire has been extinguished or after the collapse In many instances information about the last event and the starting event is known reasonably well Information about what occurred between these endpoints however is often unclear confusing and perhaps contradictory Scientific Method Applications in Failure Investigation and Forensic Science explains how scientific investigative methods can best be used to determine why and how a particular event occurred While employing examples from forensic engineering the book uses principles and ideas applicable to most of the forensic sciences The author examines the role of the failure investigator describes the fundamental method for investigation discusses the optimal way to organize evidence and explores the four most common reasons why some investigations fail The book provides three case studies that exemplify proper report writing contains a special chapter profiling a criminal case by noted forensic specialist Jon J Nordby and offers a reading list of resources for further study Concise and illustrative this volume demonstrates how the scientific method can be applied to failure investigation in ways that avoid flawed reasoning while delivering convincing reconstruction scenarios Investigators can pinpoint where things went wrong providing valuable information that can prevent another catastrophe **Diagrammatic Representation and Inference** Peter Chapman,Gem Stapleton,Amirouche Moktefi,Sarah Perez-Kriz,Francesco Bellucci,2018-06-07 This book constitutes the refereed proceedings of the 10th International Conference on the Theory and Application of Diagrams Diagrams 2018 held in Edinburgh UK in June 2018 The 26 revised full papers and 28 short papers presented together with 32 posters were carefully reviewed and selected from 124 submissions The papers are organized in the following topical sections generating and drawing Euler diagrams diagrams in mathematics diagram design principles and classification reasoning with diagrams Euler and Venn diagrams empirical studies and cognition Peirce and existential graphs and logic and diagrams
