Comprehension Jose Otero, Jos, A. Leçn, Arthur C. Graesser, 2014-04-04 This volume's goal is to provide readers with up to date information on the research and theory of scientific text comprehension It is widely acknowledged that the comprehension of science and technological artifacts is very difficult for both children and adults The material is conceptually complex there is very little background knowledge for most individuals and the materials are often poorly written Therefore it is no surprise that students are turned off from learning science and technology Given these challenges it is important to design scientific text in a fashion that fits the cognitive constraints of the learner The enterprise of textbook design needs to be effectively integrated with research in discourse processing educational technology and cognitive science This book takes a major step in promoting such an integration This volume provides an important integration of research and theory with theoretical methodological and educational applications includes a number of chapters that cover how science text information affects mental representations and strategies introduces important suggestions about how text design and new technologies can be thought of as pedagogical features and establishes academic text taxonomies and a consensus of the criteria to organize inferences and other mental mechanisms *Educational Policy Evaluation through International*

Comparative Assessments Rolf Strietholt, Wilfried Bos, Jan-Eric Gustafsson, Monica Rosén, 2014 One of the most salient findings from the field of education is that there are huge national differences in student achievement as shown in international comparative studies like PISA and TIMSS The shockingly large gap between the highest performing countries mostly in East Asia and many European countries corresponds to a difference in attainment of two years of schooling Although this finding has been replicated in several studies the reasons for and consequences of such differences are currently not well understood This book is a collection of essays and studies by leading experts in international comparative education who demonstrate how international comparative assessments can be used to evaluate educational policies The volume is organized into two parts that address first theoretical foundations and methodological developments in the field of international assessments and second innovative substantive studies that utilize international data for policy evaluation studies The intention of this book is to revisit the idea of using the world as an educational laboratory both to inform policy and to facilitate theory development
