Community Emergency Response Team Homeland Security Dept., Federal Emergency Management Agency, 2018. CERT Community Emergency Response Team is a critical program in the effort to engage everyone in America in making their communities safer more prepared and more resilient when incidents occur. Community based preparedness planning allows us all to prepare for and respond to anticipated disruptions and potential hazards following a disaster. As individuals we can prepare our homes and families to cope during that critical period. Through pre event planning neighborhoods and worksites can also work together to help reduce injuries loss of lives and property damage. Neighborhood preparedness will enhance the ability of individuals and neighborhoods to reduce their emergency needs and to manage their existing resources until professional assistance becomes available. Studies of behavior following disasters have shown that groups working together in the disaster period perform more effectively if there has been prior planning and training for disaster response. These studies also show that organized grassroots efforts may be more successful if they are woven into the social and political fabric of the community neighborhood associations schools workplaces places of worship and other existing organizations. Effective response therefore requires comprehensive planning and coordination of all who will be involved government volunteer groups private businesses schools and community organizations. With training and information individuals and community groups can be prepared to serve as a crucial resource capable of performing many of the emergency functions needed in the immediate post disaster period. The CERT Program is designed to train individuals to be assets to help communities prepare for effective disaster response.
