Leading at the intersection: The CEO's changing role

"Over business was imperious. You could operate and the world around you could be a vortex of activity, but you could just keep going. Now, with the combination of all the factors at play, business and what's happening outside are actually one."

The roles of the world's executives gained global prominence in the wake of the 2008 financial crisis. A recent survey suggests the roles of CEOs are changing. Business leaders express what they believe is the nature of their roles and the leadership challenges they face. Indeed, three quarters of the CEOs we interviewed said the job has changed significantly over the past decade as new pressures have forced the organization compete with the customer, new regulations, new technology, new talent, and new markets.

To be sure, the CEO role is still the top of the leadership stack. But the CEO is also at the intersection of an increasingly complex and interconnected world: the customer, the organization, the market, the global, the local, the public, the private, the government, the employee, the competitor, and a rapidly changing public. The CEO is now a "leading at the intersection" role. "How do you manage transparency (or) just how transparent are you? The more data you have, the more you have to be able to manage it, but it's important to be able to be able to manage it."

The degree of transparency that CEOs face, when they decide to be public and exposed to the public

Figure 1: How the role of the CEO changed

Figure 2: How leadership challenges have changed over the past decade

Three years ago, leadership challenges were more about managing the business, the customer, the employee, the competitor, and the public. Today, leadership challenges are more about managing the business, the customer, the employee, the competitor, and the public.
