

The Nervous System Dr. Andrew Brown

1. The central nervous system consists of brain and spinal cord.
The peripheral nervous system consists of all other nerves, ganglia, and glia.
2. The peripheral nervous system (PNS) consists of all structures both surrounding the central system. The components include sensory system which generally respond to something except digestion. The peripheral nervous system (PNS) generally takes care everything from digestion.
Sensory nerve the PNS consists of afferent which sends the info to the brain as input.
Sensory nerve the PNS carry mostly signals of the sensory as afferent connections which sends the info to the brain as input connections.
Sensory nerve the PNS also carry the motor function efferent connections and communication.
3. Nervous system is an electric system where:
Exciting another neuron will increase the chance of an action potential in the downstream.
Inhibiting another neuron will reduce the chance of an action potential from firing.
4. Nervous system can respond and respond with the stimulus as action of another neuron.
These responses are called synaptic and neuromuscular responses.
These responses happen rapidly in the other system.
Nervous system can respond and respond with the physical stimuli of another neuron. These responses are called synaptic and neuromuscular responses.
These responses happen rapidly in the other system.
5. The chemical signals:
Chemical signals from brain are passed to another through gap junctions.
These signals are passed including to neuromuscular.
Subcategory of the chemical signals:
a. fast rapid connection

Patton, Gary A. Thibodeau, 2013-02-15 Get a complete introduction to A P with the resources that makes challenging concepts easier to understand The Human Body in Health Disease 6th Edition includes 25 highly visual student friendly chapters that cover the most important structures and functions of the human body With detailed illustrations and the unique Clear View of the Human Body transparencies A P doesn't get any clearer UNIQUE Creative design includes more than 475 full color photos and illustrations to simplify explanations of difficult material UNIQUE Clear View of the Human Body transparencies embedded within the textbook provide a graphically stunning atlas of the male and female body that can be peeled back layer by layer Quick Check questions active learning activities including case studies study tips outline summaries and more provide helpful reviews and self assessment opportunities A straightforward conversational writing style explains difficult anatomy and physiology principles UNIQUE Special boxes throughout each chapter help reinforce and apply what you've learned with specific guidance in Health and Well being Clinical Applications Research Issues and Trends Science Applications NEW Art layout and content updates in each chapter give you the most current visual and textual information possible NEW Terms and pronunciations lists at the beginning of each chapter familiarize you with new terms and the meanings of individual word parts NEW Division of previous Cells and Tissues chapter breaks the material into two chapters Chapter 3 Cells and Chapter 4 Tissues to provide a much more digestible serving of the information [The Primate Nervous System, Part I](#)

Floyd E. Bloom, A. Bjorklund, T. Hokfelt, 1997-05-07 This volume is a new timely and fitting extension to the Handbook of Chemical Neuroanatomy focussing on the neurochemical circuitry of the primate brain The book will compliment the growing efforts to apply the analytical strategies of chemical neuroanatomy to the primate brain The goal of this volume is to develop a broad based coverage of human and non human primate chemical neuroanatomic details together within a volume in which details on transmitters and systems can be appreciated The eight comprehensive chapters that comprise this volume deal with large global concepts and datasets which not only create an initial coverage of the entire primate neuraxis but also capture useful points of information on the chemical neuroanatomy of the primate nervous system An excellent informative book and a welcome addition to the sparse literature in this field **Review Questions and**
