Munyaradzi, Nhemachena, Artwell, 2017-08-16 Despite sustained continental and national struggles for autonomy sovereignty and independence in postcolonial Africa the continent is increasingly embattled by the forces of globalisation which threaten African identity that is at the core of African struggles for continental and national unity Situating the debates in the contemporary discourses on decoloniality global consumerism global food apartheid and the challenges and prospects of the emergent sharing economies this book critically examines the importation use and implications of genetically modified organisms GMOs and other such non food products on African bodies institutions and cultures The book poses questions about how Africa can be decolonised both politically and in terms of global food apartheid and the dehumanising importation and use of foreign non food products some of which militate against the ethos of African identity Renaissance and indigeneity On note the book urges the African continent to ensure the safety of imports ensuing from the global flows and circulations that are mired in the resilient invisible global matrices of power **The Green Book** Shawn F. Brown, 2024-01-26 The

Green Book For Black Folks in Education is a nonfiction book written for parents and educators to examine best practices for supporting Black children in schools Dr Brown addresses topics such as parenting high expectations unconscious bias community culture and navigating the traditional American educational system This book provides a professional and personal lens to view the experiences of Black children in schools Consumer Neuroscience - Foundation, Validation, and Relevance Thomas Zoëga Ramsøy, Hilke Plassmann, Carolyn Yoon, Joseph T. Devlin, 2023-08-07 Consumer neuroscience has

become an expanding area of both research and conduct spanning from academic interests in the brain bases of consumption choices to commercial application of neuroscience tools and metrics However many of these advances are still criticized for low applicability scattered publication records conceptual vagueness and a lack of proper scientific and commercial validation To make matters worse there is now a host of proposed commercial applications of both the insights from neuroscience and the application of neuroscience and neurophysiology tools to test consumer responses While many of these approaches may be valid many other approaches are either not properly validated or may be flawed misguided or even outright lies As a discipline there is a need for both the basic and applied research in consumer neuroscience to become aligned The purpose of this Research Topic is to provide this much needed platform for such an industrial alignment In doing

so this Research Topic will provide perspectives on three main areas 1 distinctions between basic translational and applied consumer neuroscience research 2 conceptual clarification on key concepts relevant to the science and application of consumer neuroscience 3 validation of consumer neuroscience methods and how they relate to commercially relevant cases For this Research Topic we therefore welcome submissions that combine academic and commercial research all in the vein of making advances in establishing a valid applicable consumer neuroscience
