into the cylinder chambers just as the Smith Wesson M1917 revolvers had from the start The Smith Wesson Model 1917 was essentially an adaptation of that company's Second Model 44 Hand Ejector chambered instead for 45 ACP employing a shortened cylinder allowing for use of half moon clips and a lanyard ring on the butt of the frame After the First World War M1917s became popular on the civilian and police market Created in 1941 this field manual reveals a great deal about the M1917's design and capabilities Intended as a manual for those charged with operation and maintenance it details many aspects of the gun assembly accessories and target exercises Originally labeled restricted this manual was declassified long ago and is here reprinted in book form Care has been taken to preserve the integrity of the text *Manual For Rifle Practice*
