Understanding College and University Organization James L. Bess, Jay R. Dee, 2023-07-03 Now available in paperback this two volume work is intended to help readers develop powerful new ways of thinking about organizational principles and apply them to policy making and management in colleges and universities The book is written with two audiences in mind administrative and faculty leaders in institutions of higher learning and students both doctoral and Master s degree studying to become upper level administrators leaders and policy makers in higher education It systematically presents a range of

theories that can be applied to many of the difficult management situations that college and university leaders encounter. It provides them with the theoretical background to knowledgeably evaluate the many new ideas that emerge in the current literature and in workshops and conferences. The purpose is to help leaders develop their own effective management style and approaches and feel confident that their actions are informed by appropriate theory and knowledge of the latest research in the field. Without theory, organizational leaders are forced to treat each problem that they encounter as unique as if it were a first time occurrence. While leaders may have some experience with a particular issue, their solutions are usually not informed by the accumulated wisdom of others who have already encountered and resolved similar situations. The authors approach the theory of the organization and administration of colleges and universities from three quite different perspectives or paradigms, each relying on different assumptions about the reality of organizational life in colleges and universities. The positivist paradigm, primarily an omnibus systems theory, integrates the chapters into a comprehensive yet easily accessible whole. Social constructionism, the second paradigm, is introduced in each chapter to illuminate the difficulty of seeking and finding meaningful consensus on problems and policies while also addressing important ethical issues that tend to be overlooked in leadership thought and action. The third paradigm, postmodernism, draws attention to difficulties of logic and communication under the constraints of strictly linear thinking that authorities at all levels attempt to impose on organizations. This multiple paradigm approach enables readers to become more cognizant of their own assumptions, how they may differ from those of others in their organization, and how those differences may both create difficulties in resolving problems and expand the range of alternatives considered in organizational decision making. The book offers readers the tools to balance the real world needs to succeed in today's challenging and competitive environment with the social and ethical aspirations of all its stakeholders and society at large. The authors' aim is to elucidate how administration can be made more efficient and effective through rational decision making while also respecting humanistic values. This approach highlights a range of phenomena that require attention if the institution is ultimately to be considered successful. Also available: Volume 1: The State of the System. Two volume set.

The Business of Criminal Justice Daniel Adrian Doss, Chengqi Guo, Joo Young Lee, 2011-12-19. Regardless of the type, size, or mission of a criminal justice or law enforcement organization, optimum decision making can be achieved by examining activities and functions from the perspective of traditional business administration. Using profit and nonprofit business models, *The Business of Criminal Justice: A Guide for Theory and Practice* integrates the two philosophies of traditional management and finance and service-oriented benefit and demonstrates how success in these organizations is dependent on using the proper business model. Topics discussed in this forward-thinking volume include: The basic characteristics of qualitative and quantitative human decisions that affect law enforcement organizations; Management theory and the concepts of controlling, coordinating, leading, organizing, and planning; Strategic management and long-term decisions that affect law enforcement and justice-related entities for five or more years.

Quality management and operations management of law enforcement entities The influences of economics on the administration of law enforcement entities Various aspects of mathematical modeling that influence human decision making to fulfill a stated objective Models that support the expending of funds to benefit the organization and its stakeholders while rendering public service Building relationships between the law enforcement entity and society through marketing branding and advertising Demonstrating how the concepts of business administration influence law enforcement and government organizations this volume is a critical decision making tool for law enforcement and criminal justice entities ranging from small town sheriff s offices to large federal enterprises

Educational Leadership and Organizational Management Victor C.X. Wang,Bernice Bain,John Hope,Catherine A. Hansman,2016-10-01 This book is intended for students leaders and managers who wish to explore the personal relevance and conceptual bases of educational leadership and organizational management and to develop their expertise in this field It is a book written for both scholars and practitioners The general public will also appreciate the accessible language in the book There are two goals in the experiential learning process One is to learn the specifics of a particular subject matter in this case educational leadership and organizational management The other is to learn about one s own strengths and weaknesses as a learner This book is focused on the analysis of prevalent theories and concepts and their application to the development of leadership and management skills and the knowledge and attitudes required to solve real world problems in the workplace For decades students have focused their studies of educational leadership and organizational management theories in classroom settings without actual opportunities to apply these theories in the workplace A profound and significant lesson learned in history is that we must follow the principle of integrating theory with

practice unity of theory with practice Then we can follow the policy of walking on two legs an analogy made by the late Chinese chairman Mao Ze Dong

Storytelling and the Future of Organizations David M. Boje,2011-04-26 Storytelling is part of social action and interaction that actually shapes the future of organizations Organization and management studies have overwhelmingly focused to date on rational narrative structures with beginnings middles and ends where narrative has proved to be a handy concept in qualitative studies Far less attention is given however to the more spontaneous and non staged storytelling that occurs in organizations Storytelling and the Future of Organizations explores the science and practice of antenarrative because that is how the future of organization is shaped Antenarrative is a term invented by David M Boje in 2001 and is defined as a bet on the future as before narrative linearity coherence and stability sets in Antenarrative is all about prospective sensemaking betting on the future before narrative retrospection fossilizes the past Antenarrative storytelling is therefore agential in ways that traditional narratology has yet to come to grips with This handbook contribution is bringing together a decade of scholarship on antenarrative It is the first volume to offer such a varied but systematic examination of non traditional narrative inquiry in the management realm organizing and developing its approach and providing new insights for management students and scholars
