Kushniruk, David R. Kaufman, Thomas G. Kannampallil, Vimla L. Patel, 2024-11-13 This thoroughly updated edition reports on the current state of human computer interaction HCI in biomedicine and healthcare focusing on the cognitive underpinnings of human interactions with people and technology With health information technologies becoming increasingly vital tools for the practice of clinical medicine this book draws from key theories models and evaluation frameworks and their application in biomedical contexts to apply this to current research in HCI However numerous challenges remain in order to fully realize their potential as instruments for advancing clinical care and enhancing patient safety There is a general consensus that health IT has not realized its potential as a tool to facilitate clinical decision making the coordination of care and improvements in patient safety Embracing sound principles of iterative design can yield significant dividends It can also enhance practitioner s abilities to meet meaningful use requirements The purpose of the book is two fold to address key gaps on the applicability of theories models and evaluation frameworks of HCI and human factors for research in biomedical informatics It highlights the state of the art drawing from the current research in HCI It also serves as a graduate level

textbook highlighting key topics in HCI relevant for biomedical informatics computer science and social science students working in the healthcare domain Cognitive Informatics for Biomedicine Human Computer Interaction in Healthcare is indispensable to those who want to ensure that the systems they build and the interactive environments that they promote will reflect the rigor and dedication to human computer interaction principles that will ultimately enhance both the user's experience and the quality and safety of the care that is offered to patients It is an essential reference to all who are interested in the application of these new techniques within healthcare from students of informatics through to clinicians informatics researchers and developers of health IT looking to incorporate them into their day to day workflow

The Human Factor of Cybercrime Rutger Leukfeldt, Thomas J. Holt, 2019-10-11 Cybercrimes are often viewed as technical offenses that require technical solutions such as antivirus programs or automated intrusion detection tools However these crimes are committed by individuals or networks of people which prey upon human victims and are detected and prosecuted by criminal justice personnel As a result human decision making plays a substantial role in the course of an offence the justice response and policymakers attempts to legislate against these crimes This book focuses on the human factor in cybercrime its offenders victims and parties involved in tackling cybercrime The distinct nature of cybercrime has consequences for the entire spectrum of crime and raises myriad questions about the nature of offending and victimization For example are cybercriminals the same as traditional offenders or are there new offender types with distinct characteristics and motives What foreground and situational characteristics influence the decision making process of offenders Which personal and situational characteristics provide an increased or decreased risk of cybercrime victimization This book brings together leading criminologists from around the world to consider these questions and examine all facets of victimization offending offender networks and policy responses Chapter 13 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Touch Screen Tablets Touching Children's Lives Joanne Tarasuik, Gabrielle Strouse, Jordy Kaufman, 2018-02-28 Touch screen tablets have greatly expanded the technology accessible to preschoolers toddlers and even infants given that they do not require the fine motor skills required for using traditional computers Many parents and educators wish to make evidence based decisions regarding young children's technology use yet technological advancements continue to occur faster than researchers can keep up with Accordingly despite touch screen tablets entering society more than 5 years ago we are in the infancy of research concerning interactive media and children The topic has gained traction in the past couple of years For example theoretical papers have discussed how interactive media activities differ from physical toys and passive media Christakis 2014 and how educational apps development should utilise the four pillars of learning Hirsh-Pasek et al 2015 Yet there has been little experimental research published on young children and touch screen use
