Undocumented and Unaccompanied Cecilia Menjívar,Krista Perreira,2021-11-29 This book focuses on the migration of undocumented minors arriving recently to the United States and the European Union flows that are often labeled undocumented illegal or irregular and due to their sudden increase they have been described in the media policy circles and scholarly work as a surge or a crisis Leading scholars examine the intricacies of the contexts that these minors encounter in the localities where they arrive including the legal and ethical frameworks for protecting unaccompanied minors governmental decisions about the best interests of the children these minors expressions of their own best interests or agency as they navigate immigration and social service systems conditions in detention centers and the health and social service needs in receiving communities Though definitions and techniques for counting unaccompanied migrant minors differ between the U S and the EU this book underscores the immigrant minors common vulnerabilities and strategies they adopt to protect themselves and improve their circumstances At the same time contributors to the volume highlight common challenges that both European and U S governments face as they develop policy strategies and legal mechanisms to attempt to balance the best interests of these children with national interests of the countries in which they settle The chapters in this book were originally published as a special issue of the Journal of Ethnic and Migration Studies **Chronicles of Care: A Design History of the COVID-19 Virus** Paul A. Rodgers,Fernando Galdon,Craig Bremner,2024-04-16 The Covid 19 crisis

and the designed interventions that the authors have catalogued in this book prove definitively that design does care. The authors documented this as it evolved every day from the 1st January 2020 to 31st May 2020 inclusive. Then they looked at all of this care and caring from the point of view of design and by the sheer volume of design interventions they have documented illustrate that design is good in a crisis. What the Covid 19 pandemic illustrated is that for the first time in modern history capital was totally irrelevant. Money could not save your life. Only design could. Rapidly designed masks, shelters, hospitals, instructional posters, infographics, dashboards, respirators, sanitisers, virtual and local communities emerged to save us. From January 2020 design became king. The Covid 19 global pandemic presented an ontological reality: design is more than margins or profit. In fact, design became extremely valuable when it stopped concentrating on those things and started to care about people's lives. This brief episode in history is still repositioning the status of design and reconfiguring its signifier from consumption to care. The contents of this book cover the outbreak, lockdown, and the beginning of the reopening in the UK. In between, the book functions as a history of pandemic crisis design interventions. As such, it is a research in the moment project where we have illustrated our thoughts and insights in tables, charts, and diagrams. We have accepted all design interventions as valid and given them the same role and status by presenting each of them in a standard format. No curation. No selection. No position. The task of critical analysis must follow, perhaps by us, certainly by others.

Advances in Gas Phase Ion Chemistry L.M. Babcock, N.G. Adams, 2001-12-21. Gas phase ion chemistry is a broad field that has many applications and which encompasses various branches of chemistry and physics. *Advances in Gas Phase Ion Chemistry* Volume 4 describes innovative ways of studying reactions as well as the application of unique apparatuses to problems in this field. This volume contains a series of chapters in the general area of gas phase chemistry and physics which are at the cutting edge of research. The chapters are not meant to be general reviews but focus on the author's own work. They focus on both experimental and theoretical work which gives a balance to the volume. Applications are included to appeal to a wider audience and to broaden the knowledge of the more fundamentally inclined. An application to environmental pollution monitoring and medical monitoring of breath is included. With successive volumes the coverage broadens to include more current research in the title area. The book is aimed at graduate researchers, university faculty, and graduates in industry. The editors have made a specific effort to include contributions from those relatively new to the field which brings in new ideas and perspectives as well as those more established workers who bring a wealth of experience.
