Koduvely,2015-10-28 Become an expert in Bayesian Machine Learning methods using R and apply them to solve real world big data problems About This Book Understand the principles of Bayesian Inference with less mathematical equations Learn state of the art Machine Learning methods Familiarize yourself with the recent advances in Deep Learning and Big Data frameworks with this step by step guide Who This Book Is For This book is for statisticians analysts and data scientists who want to build a Bayes based system with R and implement it in their day to day models and projects It is mainly intended for Data Scientists and Software Engineers who are involved in the development of Advanced Analytics applications To understand this book it would be useful if you have basic knowledge of probability theory and analytics and some familiarity with the programming language R What You Will Learn Set up the R environment Create a classification model to predict and explore discrete variables Get acquainted with Probability Theory to analyze random events Build Linear Regression models Use Bayesian networks to infer the probability distribution of decision variables in a problem Model a problem using Bayesian Linear Regression approach with the R package BLR Use Bayesian Logistic Regression model to classify numerical data Perform Bayesian Inference on massively large data sets using the MapReduce programs in R and Cloud computing In Detail Bayesian Inference provides a unified framework to deal with all sorts of uncertainties when learning patterns form data using machine learning models and use it for predicting future observations However learning and implementing Bayesian models is not easy for data science practitioners due to the level of mathematical treatment involved Also applying Bayesian methods to real world problems requires high computational resources With the recent advances in computation and several open sources packages available in R Bayesian modeling has become more feasible to use for practical applications today Therefore it would be advantageous for all data scientists and engineers to understand Bayesian methods and apply them in their projects to achieve better results Learning Bayesian Models with R starts by giving you a comprehensive coverage of the Bayesian Machine Learning models and the R packages that implement them It begins

with an introduction to the fundamentals of probability theory and R programming for those who are new to the subject Then the book covers some of the important machine learning methods both supervised and unsupervised learning implemented using Bayesian Inference and R Every chapter begins with a theoretical description of the method explained in a very simple manner Then relevant R packages are discussed and some illustrations using data sets from the UCI Machine Learning repository are given Each chapter ends with some simple exercises for you to get hands on experience of the concepts and R packages discussed in the chapter The last chapters are devoted to the latest development in the field specifically Deep Learning which uses a class of Neural Network models that are currently at the frontier of Artificial Intelligence The book concludes with the application of Bayesian methods on Big Data using the Hadoop and Spark frameworks Style and approach The book first gives you a theoretical description of the Bayesian models in simple language followed by details of its implementation in the R package Each chapter has illustrations for the use of Bayesian model and the corresponding R package using data sets from the UCI Machine Learning repository Each chapter also contains sufficient exercises for you to get more hands on practice **Data Science Concepts and Techniques with Applications** Usman Qamar,Muhammad Summair Raza,2023-04-02 This textbook comprehensively covers both fundamental and advanced topics related to data science Data science is an umbrella term that encompasses data analytics data mining machine learning and several other related disciplines The chapters of this book are organized into three parts The first part chapters 1 to 3 is a general introduction to data science Starting from the basic concepts the book will highlight the types of data its use its importance and issues that are normally faced in data analytics followed by presentation of a wide range of applications and widely used techniques in data science The second part which has been updated and considerably extended compared to the first edition is devoted to various techniques and tools applied in data science Its chapters 4 to 10 detail data pre processing classification clustering text mining deep learning frequent pattern mining and regression analysis Eventually the third part chapters 11 and 12 present a brief introduction to Python and R the two main data science programming languages and shows in a completely new chapter practical data science in the WEKA Waikato Environment for Knowledge Analysis an open source tool for performing different machine learning and data mining tasks An appendix explaining the basic mathematical concepts of data science completes the book This textbook is suitable for advanced undergraduate and graduate students as well as for industrial practitioners who carry out research in data science They both will not only benefit from the comprehensive presentation of important topics but also from the many application examples and the comprehensive list of further readings which point to additional publications providing more in depth research results or provide sources for a more detailed description of related topics This book delivers a systematic carefully thoughtful material on Data Science from the Foreword by Witold Pedrycz U Alberta Canada **Passion to Passive Profits** Minimalist Hustler,2022-01-17 I tried the corporate 9 5 world It wasn t for me I didn t want a boss I tried running my own business It wasn t for me I didn t want

employees I didn t even really want to deal with customers All I knew is that I needed to find a way to make money that I enjoyed I tried Uber Eats DoorDash I love driving it was fun and paid decently BUT Then I realized it wasn t money that I wanted I wanted time and freedom I needed to find a way to disconnect my income from my time I started investing but I didn t want to be a day trader so I started investing in dividend stocks and the passive income from that is great but unless you have a ton of money to invest the income from it isn t enough I now knew that I had to find a way to create passive income without investing a lot of money or even any money at all This is when I discovered digital assets and I m not talking about Cryptocurrency or NFTs although I am currently invested in both of those The digital assets I m talking about are easy to create on your own for free They finally allowed me to own more of my time and most importantly have given me freedom In this book I will show you the exact methods I use to create these 7 different types of digital assets and how I leverage different marketplaces to make passive income from each one Articles Courses eBooks Graphics Photos Printables Templates The best part about these digital assets is that I can create ones that are directly related to my passions from hockey to food and of course side hustles And it can work for absolutely any passion I guarantee it If you can t figure out how to monetize your passion with this eBook you can email me directly and I will give you some examples The book is called Passion to Passive Profits What will you learn from this eBook How to turn your passion s into 7 types of digital assets How to turn those digital assets into passive income streams How to work smarter not harder when it comes to creating them How much time do you need to put in Have an hour a day to do it Great Have three hours a day to do it Awesome Have ten hours a day to do it Incredible The reality is the more time you put in the more passive income you ll create for yourself How much money will you make The more assets you make the more money you will make The amount will depend on the quantity and quality of your assets and your listings on the various marketplaces Want to play around with some numbers and see the math Let s assume it takes you an hour to make 1 digital asset some can be more some less and each sale brings in 1 profit again some can be more some less and you make on average only 1 sale per week per asset If you do 1 hour day and stop after a year you ll have 365 assets which will give you 18 980 passive profits per year forever If you do 3 hours day and stop after a year you ll have 1095 assets which will give you 56 940 passive profits per year forever If you do 10 hours day and stop after a year you ll have 3650 assets which will give you 189 800 passive profits per year forever And that s from only 1 year of creating assets what if you did it for 2 5 or 10 years Looking forward to working with you and monetizing your passions I m always just a DM or email away for any help or questions Jamie a k a Minimalist Hustler
