**The Evolution of English Language Learners in Japan** Yoko Kobayashi, 2018-01-19 This book seeks a better understanding of the sociocultural and ideological factors that influence English study in Japan and study abroad contexts such as university bound high schools female dominant English classes at college ESL schools in Canada and private or university affiliated ESL programs in Singapore and Malaysia The discussion is based not only on data garnered from Japanese EFL learners and Japanese overseas educators but also on official English language policies and commercial magazine discourses about English study for Japanese people The book addresses seemingly incompatible themes that are either entrenched in or beyond Japan s EFL context such as Japan s decades long poorly performing English education vs its equally long lived status as an economic power Japanese English learners preference for native English speakers norms in at home Japanese EFL contexts vs their friendship with other Asian students in western study abroad contexts Japanese female students dream of using English to further their careers vs Japanese working women s English study for self enrichment Japanese society s obsession with globalization through English study vs the Japanese economy sustained by monolingual Japanese businessmen Japanese business magazines frequent cover issues on global business English study vs Japanese working women s magazines less frequent and markedly feminized discourses about English study

**The Birth of Orientalism** Urs App, 2011-06-06 Modern Orientalism is not a brainchild of nineteenth century European imperialists and colonialists but as Urs App demonstrates was born in the eighteenth century after a very long gestation period defined less by economic or political motives than by religious ideology Based on sources from a dozen languages many unavailable in English The Birth of Orientalism presents a completely new picture of this protracted genesis its underlying dynamics and

the Western discovery of Asian religions from the sixteenth to the nineteenth century App documents the immense influence of Japan and China and describes how the Near Eastern cradle of civilization moved toward mother India Moreover he shows that some of India s purportedly oldest texts were products of eighteenth century European authors Though Western engagement with non Abrahamic Asian religions reaches back to antiquity and can without exaggeration be called the largest scale religiocultural encounter in history it has so far received surprisingly little attention which is why some of its major features and their role in the birth of modern Orientalism are described here for the first time The study of Asian documents had a profound impact on Europe s intellectual makeup Suddenly the Bible had much older competitors from China and India Sanskrit threatened to replace Hebrew as the world s oldest language and Judeo Christianity appeared as a local phenomenon on a dramatically expanded worldwide canvas of religions and mythologies Orientalists were called upon as arbiters in a clash that involved neither gold and spices nor colonialism and imperialism but rather such fundamental questions as where we come from and who we are questions of identity that demanded new answers as biblical authority dramatically waned

**1000 Most Common English Phrases** Salim Khan Anmol,2021-07-29 1000 Most Common English Phrases Best English Grammar Book Learn English Grammar in Two Week Revised Edition Adjective of English Grammar 2 Minute Grammar class This book was begun as a result of the author s experience in teaching some classes in English in the night preparatory department of the Carnegie Technical Schools of Pittsburg The pupils in those classes were all adults and needed only such a course as would enable them to express themselves in clear and correct English English Grammar with them was not to be preliminary to the grammar of another language and composition was not to be studied

beyond the everyday needs of the practical man Great difficulty was experienced because of the inability to secure a text that was suited to the needs of the class A book was needed that would be simple direct and dignified that would cover grammar and the essential principles of sentence structure choice of words and general composition that would deal particularly with the sources of frequent error and would omit the non essential points and finally that would contain an abundance of exercises and practical work It is with these ends in view that this book has been prepared The parts devoted to grammar have followed a plan varying widely from that of most grammars and an effort has been made to secure a more sensible and effective treatment The parts devoted to composition contain brief expositions of only the essential principles of ordinary composition Especial stress has been laid upon letter writing since this is believed to be one of the most practical fields for actual composition work Because such a style seemed best suited to the general scheme and purpose of the book the method of treatment has at times been intentionally rather formal
