We encourage the submission of manuscripts addressing the above topic and those which fit within one of the following three sub themes i Perspectives or review articles which explore the niche best practices or promising approaches in agile data oriented research tools for smallholder farm system transformation Also technology and code articles that describe new tools are welcomed ii Original research articles presenting analyses based on data derived from agile data oriented tools used at the project level Examples include impact evaluations adoption studies targeting studies or adaptive management and should reflect on the additional benefit leveraged by the agile method applied iii Original research articles that make use of the large amounts of data generated by such agile methods and or link between agile data and other data sources Examples include meta analyses of data from multiple studies layering data collected from different agile tools or linking agile data to remote sensing or large scale modeling outputs
