Planet Strike Extinction Wars:

Planet Strike Vaughn Heppner, 2014-03-08 Earth's last Assault Troopers storm an alien ship the size of a planet. After escaping from the Jelk Corporation and hijacking a battlejumper, Creed thought he was free of the extraterrestrials and their war. Now the Lokhars want to hire him, offering advanced technology to clean the radioactive Earth and starships to defend the Solar System. The mission: After untold centuries, an ancient planet-sized vessel has gone online, opening a gateway to a collapsing universe. Anti-life aliens are coming through. Before it's too late, the assault troopers have to storm the ship and seal the portal. Creed will do anything to save the last remnants of humanity, but this will be a commando raid like no other against an enemy that shouldn't exist. Creed will need all his cunning and determination if he hopes to bring his people back alive.

International Seminar On Nuclear War And Planetary Emergencies - 32nd Session: The 32nd Session Of International Seminars And International Collaboration Richard C Ragaini, 2005-06-20 This volume contains the proceedings of the 32nd International Seminar on Nuclear War and Planetary Emergencies, which was attended by global leaders in their scientific fields, advisors to presidents, defence secretaries, and high-level diplomats. Readers are invited to participate in the fascinating debate on the wide range of subjects covered, including migration, global warming, pollution, the cultural planetary emergency, AIDS, and infectious diseases, water conflicts, and energy. The proceedings have been selected for coverage in *Index to Scientific Technical Proceedings*, *ISTP*, *ISI Proceedings*, *Index to Scientific Technical Proceedings*, *ISTP CDROM*, *version ISI Proceedings*, *Index to Social Sciences Humanities Proceedings*, *ISSHP*, *ISI Proceedings*, *Index to Social Sciences Humanities Proceedings*, *ISSHP CDROM*, *version ISI Proceedings*, *CC Proceedings*, *Engineering Physical Sciences*, *CC Proceedings*, *Biomedical Biological Agricultural Sciences*. *War and Algorithm* Max Liljefors, Gregor Noll, Daniel Steuer, 2019-10-11 New military technologies are animated by fantasies of perfect knowledge, lawfulness, and vision that contrast sharply with the very real limits of human understanding, law, and vision. Thus, various kinds of violent acts are proliferating while their precise nature remains unclear. Especially, man-machine ensembles guided by algorithms are operating in ways that challenge conceptual understanding. *War and Algorithm* looks at the increasing power of algorithms in these emerging forms of warfare from the perspectives of critical theory, philosophy, legal studies, and visual studies. The contributions in this volume grapple with the challenges posed by algorithmic warfare and trace the roots of new forms of war in the technological practices and forms of representation of the digital age. Together, these contributions provide a first step toward understanding and resisting our emerging world of war. [International Seminar On Nuclear War And Planetary Emergencies - 43rd Session](#) Richard C Ragaini, 2011-06-08 Proceedings of a seminar focusing on planetary emergencies followed in a multidisciplinary approach since 1980 by permanent monitoring panels. *Planetary Defense* Nikola Schmidt, 2018-12-26 Planetary defense from near-Earth objects such as asteroids is a far more nuanced and challenging topic than it might seem. Each day, technology is making it easier to detect asteroid impact threats in advance, but

at present there is still no easy way to design and implement any form of global defense This book examines how various asteroid deflection methods can change global political affairs The authors believe that the final policy for potential Earth impacts should be based on practical engineering solutions and innovative architectural structures while at the same time reflecting the most recent political science contributions in ethical security studies and security cosmopolitanism Their focus is not limited to effective engineering solutions but rather extends to how such proposals resonate in possible political structures of the future Planetary defense cannot be achieved with technology alone the chapters in this volume highlight the issues that arise when space science and technology intersect with political science This complex interdisciplinary project not only demands global participation and collaboration but also proposes the way we can achieve it The authors explore various concepts of governance and their far reaching implications for planetary defense and vice versa how scientific progress in Solar System observations and asteroid collision engineering influence political science and put pressure on the international legal framework The text is intentionally written for a diverse scholarly and diplomatic audience in a style accessible to non specialists and practitioners and can be read by those across diverse disciplinary backgrounds

Six Minutes to Winter Mark Lynas, 2025-05-08 Terrifying and timely this is a book everyone should read and heed George Monbiot Urgent gripping and sobering Six Minutes to Winter is a hair raising wake up call David Wallace Wells Powerful and insightful Although many have forgotten about nuclear weapons we shouldn't Charles Oppenheimer The world is currently closer to superpower conflict than at any time since the 1962 Cuban Missile Crisis World War III is a real possibility and with 12 000 warheads in the arsenals of more than half a dozen countries we are standing on a nuclear knife edge Despite receiving very little attention nuclear war is a far greater threat to humanity's immediate survival than climate change While climate heating threatens humanity over many decades nuclear war could destroy civilisation in just a few hours A major missile exchange would mean months of near total darkness followed by a decade long global nuclear winter that would destroy most life on Earth Virtually everyone would starve in the resulting worldwide famine and there would be no reliable refuge We are sleepwalking to Armageddon There are no mass marches no COPs no nuclear Greta But the climate experience teaches us that ignoring a problem is no solution and that a worldwide mobilisation can work Six Minutes to Winter presents an unflinching view of the nuclear nightmare but also describes how weapons can be taken off hair trigger alert and ultimately abolished altogether If human civilisation is to survive long term we have no alternative

A Question of Belief John O'Loughlin, 2022-03-03 Mr O Loughlin s third volume of philosophy dating from 1978 is composed of four lengthy philosophical dialogues which debate subjects as varied as books and book collecting war and peace astrology and the necessity if one is to be fair to the past of keeping things in historical perspective rather than

imposing contemporary criteria upon them Unlike plays these dialogues are intended primarily to instruct and even to enlighten rather than simply to entertain and tend to be conversationally one sided as befitting their didactic intent with a kind of teacher pupil relationship which is nonetheless fairly flexible Dante's War Paul Nevins,2003-02-20 An alien invasion is imminent and only you know it is going to happen You have been having dreams They show you the future You know they aren't merely dreams but a warning You try to tell people but no one believes you You are committed against your will and after seventy two hours of psychiatric evaluation you are released Forty eight hours later the invasion begins What would you do Dante Mason did the only thing he could do he fought back Nuclear Winter and Its Implications United States. Saberhagen Cordwainer Smith Allen Steele William Tenn Walter Jon Williams Michael Z Williamson Gene Wolfe The Palgrave Handbook of Global Politics in the 22nd Century Laura Horn, Ayşem Mert, Franziska Müller, 2023-01-01 This handbook offers a unique approach to the question How do scholars write the future of global politics Written in futuristic style around the 200 year anniversary of the birth of International Relations IR as an academic discipline the contributions engage in world building and imagine different futures of IR Set in a multiverse 23 chapters draw on a range of possible themes and imaginaries for instance post pandemic conditions the Anthropocene and not least academic practices and the role of researchers A concluding chapter anchors these explorations in contemporary discussions The book mirrors the format and style of existing handbooks combining outlines and discussions of theories structures processes and core issues in IR with an academic science fiction account of how these might play out over the course of the next century In doing so the book challenges IR and provides alternative imaginaries rather than predicting future conditions for all humanity The book invites readers to reflect on how thinking about the future has become an increasingly radical but more than ever necessary act Human Extinction Émile P. Torres, 2023-06-15 This volume traces the origins and evolution of the idea of human extinction from the ancient Presocratics through contemporary work on existential risks Many leading intellectuals agree that the risk of human extinction this century may be higher than at any point in our 300 000 year history as a species This book provides insight on the key questions that inform this discussion including when humans began to worry about their own extinction and how the debate has changed over time It establishes a new theoretical foundation for thinking about the ethics of our extinction arguing that extinction would be very bad under most circumstances although the outcome might be on balance good Throughout the book graphs tables and images further illustrate how human choices and attitudes about extinction have evolved in Western history In its thorough examination of humanity's past this book also provides a starting point for understanding our future Although accessible enough to be read by undergraduates Human Extinction contains new and thought provoking research that will benefit even established academic philosophers and historians
