Werner,2016-03-11 This book is devoted to the modeling and understanding of complex urban systems This second volume of

Understanding Complex Urban Systems focuses on the challenges of the modeling tools concerning e.g. the quality and quantity of data and the selection of an appropriate modeling approach. It is meant to support urban decision makers including municipal politicians, spatial planners and citizen groups in choosing an appropriate modeling approach for their particular modeling requirements. The contributors to this volume are from different disciplines but all share the same goal: optimizing the representation of complex urban systems. They present and discuss a variety of approaches for dealing with data availability problems and finding appropriate modeling approaches and not only in terms of computer modeling. The selection of articles featured in this volume reflects a broad variety of new and established modeling approaches such as: An argument for using Big Data methods in conjunction with Agent based Modeling; The introduction of a participatory approach involving citizens in order to utilize an Agent based Modeling approach to simulate urban growth scenarios; A presentation of semantic modeling to enable a flexible application of modeling methods and a flexible exchange of data; An article about a nested systems approach to analyzing a city's interdependent subsystems according to these subsystems' different velocities of change; An article about methods that use Luhmann's system theory to characterize cities as systems that are composed of flows; An article that demonstrates how the Sen-Nussbaum Capabilities Approach can be used in urban systems to measure household well-being shifts that occur in response to the resettlement of urban households; A final article that illustrates how Adaptive Cycles of Complex Adaptive Systems as well as innovation can be applied to gain a better understanding of cities and to promote more resilient and more sustainable urban futures.

**Born to Choose** John H. Falk, 2017-09-05. Born to Choose is John H. Falk's compelling account of why and how we make the endless set of choices we do every second of every day of our lives. Synthesizing research from across the biological and social sciences, Falk argues that human choice making is an evolutionarily ancient and complex process. He suggests that all our choices are influenced by very basic and early evolving needs and that ultimately each choice is designed to support survival in the guise of perceived well-being. This engaging book breaks new intellectual ground and enhances our understanding not just of human choice making but human behavior overall.

**Policy-Making in the GCC** Neil Quilliam, Mark C. Thompson, 2017-09-11. The GCC is a major player in the post 2011 reordering of the Middle East. Despite the rise in prominence of individual Gulf states especially Kuwait, Qatar, Saudi Arabia and the United Arab Emirates and the growth of the GCC as a collective entity, surprisingly little attention has been paid to the actual mechanics of policy making in the region. This book analyses the vital role that institutions are coming to play in shaping policy in the Gulf Arab states. The research coincides with two key developments that have given institutions new importance in the policy process: the emergence of a new generation of leaders in the Gulf and the era of low oil prices. Both developments along with dramatic demographic change have compelled state and citizens to re-evaluate the nature of the social contract that binds them together. Contributors assess the changing relationship between state and citizen and evaluate the role that formal and

informal institutions play in mediating such change and informing policy The book shows how academic social and economic institutions are responding to the increasingly complex process of decision making where citizens demand better services and further empowerment and states are obliged to seek wider counsel although wanting to retain ultimate authority With contributions from both academics and practitioners this book will be highly relevant for researchers and policymakers alike

Migration, Transmission, Localisation: Visual Art in Singapore (1886-1945) Yeo Mang Thong, 2019-03-31. Drawing mainly on advertisements and comics in Chinese newspapers, Singaporean scholar and educator Yeo Mang Thong demonstrates how Singapore was an important hub for artists who travelled to and lived in Singapore. Yeo's research features, amongst other things, essays on sojourning artists and fills a gap in scholarship on the pre-war visual arts scene in Singapore. Originally in Chinese, this English translation aims to bring his research to a broader audience. *Transdisciplinary Research on Learning and Teaching: Chances and Challenges* Matthias Stadler, Frank Fischer, Arthur C.
