Monitoring the Comprehensive Nuclear-Test-Ban Treaty Catherine de Groot-Hedlin,John Orcutt,2001-06 In September 1996 the United Nations General Assembly adopted the Comprehensive Nuclear Test Ban Treaty CTBT prohibiting nuclear explosions worldwide in all environments The treaty calls for a global verification system including a network of 321 monitoring stations distributed around the globe a data communications network an international data centre IDC and on site inspections to verify compliance A global hydroacoustic monitoring system is being planned and implemented for verification of the CTBT Much of the research conducted over the past several decades on acoustic surveillance of the oceans formerly driven by the need to detect and track submarines is now being applied to the development of effective monitoring methods to verify compliance with the CTBT The aim of this volume on Hydroacoustic Monitoring of the CTBT is to summarize the research being conducted in this field and to provide basic references for future research Much of the new research emphasizes major advances in understanding the coupling of ocean acoustic waves with elastic waves in the solid Earth Topics covered include source excitation detection and classification of events generating hydroacoustic signals discrimination between underwater explosions and naturally occurring events as well as topics in coupling of acoustic to seismic wavefields

Large-Scale Studies in Mathematics Education James A. Middleton,Jinfa Cai,Stephen Hwang,2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for

objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community In fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies
