The Principal's Quick-Reference Guide to School Law Robert F. Hachiya, 2022-01-31 The Principal's Quick Reference Guide to School Law provides the go to help leaders need to navigate the complex legal aspects of today's school

Beyond the Tyranny of Testing Kenneth J. Gergen, Scherto R. Gill, 2020-09-28 Providing detailed illustrations using cases from pioneering schools around the globe at both the primary and secondary level this book demonstrates how a relational orientation to evaluation in education can enhance learning processes foster students engagement and vitality relationships and elevate the evaluation of teaching and the school as a whole

Small Sample Size Solutions Rens van de Schoot, Milica Miočević, 2020-02-13 Researchers often have difficulties collecting enough data to test their hypotheses either because target groups are small or hard to access or because data collection entails prohibitive costs Such obstacles may result in data sets that are too small for the complexity of the statistical model needed to answer the research question This unique book provides guidelines and tools for implementing solutions to issues that arise in small sample research Each chapter illustrates statistical methods that allow researchers to apply the optimal statistical model for their research question when the sample is too small This essential book will enable social and behavioral science researchers to test their hypotheses even when the statistical model required for answering their research question is too complex for the sample sizes they can collect The statistical models in the book range from the estimation of a population mean to models with latent variables and nested observations and solutions include both classical and Bayesian methods All proposed solutions are described in steps researchers can implement with their own data and are accompanied with annotated syntax in R The methods described in this book will be useful for researchers across the social

and behavioral sciences ranging from medical sciences and epidemiology to psychology marketing and economics

Reconciliation Operationalized in Mozambique Natália Bueno, 2024-11-25 In *Reconciliation Operationalized in Mozambique Charting Inclusion Truth and Justice* 1992 2022 Natália Bueno traces the development of reconciliation in Mozambique from the signing of the General Peace Agreement in 1992 to the present day bringing to light its advances and setbacks throughout the years Bueno discusses the role played by the leaders of Frelimo and Renamo during the aftermath of violent conflicts to determine how their actions affected their followers This book advances the debate on Mozambique deepening the scholarship on reconciliation in societies with violent pasts and most importantly on human rights transitional justice and conflict and peace studies Bueno addresses what reconciliation means how reconciliation has developed in Mozambique over the years and how transitional justice mechanisms relate to reconciliation She provides helpful tools for practitioners and argues for an original operationalized conceptualization of reconciliation that is defined by inclusion truth and justice This innovative conceptualization can add precision both to and within case analysis and cross case comparisons Using this framework Bueno challenges the understanding that the country was once reconciled and argues in favor of a new Mozambican solution

Transhumanism David Livingstone, 2015-09-02 Transhumanism is a recent movement that extols man's right to shape his own evolution by maximizing the use of scientific technologies to enhance human physical and intellectual potential While the name is new the idea has long been a popular theme of science fiction featured in such films as 2001 A Space Odyssey Blade Runner the Terminator series and more recently The Matrix Limitless Her and Transcendence However as its adherents hint at in their own publications transhumanism is an occult project rooted in Rosicrucianism and Freemasonry and derived from the Kabbalah which asserts that humanity is evolving intellectually towards a point in time

when man will become God Modeled on the medieval legend of the Golem and Frankenstein they believe man will be able to create life itself in the form of living machines or artificial intelligence Spearheaded by the Cybernetics Group the project resulted in both the development of the modern computer and MK Ultra the CIA s mind control program MK Ultra promoted the mind expanding potential of psychedelic drugs to shape the counterculture of the 1960s based on the notion that the shamans of ancient times used psychoactive substances equated with the apple of the Tree of Knowledge And as revealed in the movie Lucy through the use of smart drugs and what transhumanists call mind uploading man will be able to merge with the Internet which is envisioned as the end point of Kabbalistic evolution the formation of a collective consciousness or Global Brain That awaited moment is what Ray Kurzweil a director of engineering at Google refers to as The Singularity By accumulating the total of human knowledge and providing access to every aspect of human activity the Internet will supposedly achieve omniscience becoming the God of occultism or the Masonic All Seeing Eye of the reverse side of the American dollar bill

Digital Countercultures and the Struggle for Community Jessa Lingel,2017-04-07 How countercultural communities have made the Internet meet their needs subverting established norms of digital technology use Whether by accidental keystroke or deliberate tinkering technology is often used in ways that are unintended and unimagined by its designers and inventors In this book Jessa Lingel offers an account of digital

technology use that looks beyond Silicon Valley and college dropouts turned entrepreneurs Instead Lingel tells stories from the margins of countercultural communities that have made the Internet meet their needs subverting established norms of how digital technologies should be used Lingel presents three case studies that contrast the imagined uses of the web to its lived and often messy practicalities She examines a social media platform developed long before Facebook for body modification enthusiasts with early web experiments in blogging community wikis online dating and podcasts a network of communication technologies both analog and digital developed by a local community of punk rockers to manage information about underground shows and the use of Facebook and Instagram for both promotional and community purposes by Brooklyn drag queens Drawing on years of fieldwork Lingel explores issues of alterity and community inclusivity and exclusivity secrecy and surveillance and anonymity and self promotion By examining online life in terms of countercultural communities Lingel argues that looking at outsider experiences helps us to imagine new uses and possibilities for the tools and platforms we use in everyday life

The long and short of mental time travel-- self-projection over time-scales large and small James M. Broadway, Claire M. Zedelius, Jonathan W. Schooler, Simon Grondin, 2015-07-02 Researchers working in many fields of psychology and neuroscience are interested in the temporal structure of experience as well as the experience of time at scales of a few milliseconds up to a few seconds as well as days months years and beyond This Research Topic supposes that broadly speaking the field of time psychology can be organized by distinguishing between perceptual and conceptual time scales Dealing with conceptual time mental time travel also called mental simulation self projection episodic semantic memory prospection foresight allows humans and perhaps other animals to imagine and plan events and experiences in their personal futures based in large part on memories of their personal pasts as well as general knowledge Moreover contents of human language and thought are fundamentally organized by a temporal dimension enmeshed with it so thoroughly that it is usually expressible only through spatial metaphors But what might such notions have to do with experienced durations of events lasting milliseconds up to a few seconds during the so called present moment of perception action cycle time This Research Topic is organized around the general premise that by considering how mental time travel might scale down to time perception and vice versa no less progress and integrative synthesis within and across scientific domains might be facilitated Bipolar configurations of future

and past orientations of the self may be repeated in parallel across conceptual and perceptual time scales subsumed by a general Janus like feedforward feedback system for goal pursuit As an example it is notable that the duality of prospection and semantic episodic memory operating at conceptual time scales has an analogue in perception action cycle time namely the interplay of anticipatory attention and working memory Authors from all areas of psychology and neuroscience are encouraged to submit articles of any format accepted by the journal Original Research Methods Hypothesis Theory Reviews etc which might speak to questions about time and temporal phenomena at long and or short time scales *Values, Economic Crisis and Democracy* Mălina Voicu, Ingvill C. Mochmann, Hermann Dülmer, 2016-01-29 For the past decade European countries have undergone a severe economic crisis with severe consequences both for individuals and for governments Unemployment and rising poverty have compelled individuals to reconsider their own priorities and goals while governments have been forced to rethink social policies on the national level as well as their international economic and political agreements Some countries have been more deeply affected by the crisis than others and the impact of economic shortage on individuals and governments has differed not only because of the different magnitudes of the crisis but also because individuals react differently to the contextual changes This book makes use of cross national survey data to explore the impact of wealth and economic contexts on social values Instead of attempting to explain how aggregate changes occur as previous volumes have done the chapters in this collection focus on micro level effects to interrogate more deeply the interplay between attitudes and values and the way both can change as a result of transformation of economic context This book elaborates on several dimensions of value change the measurement model and the way it changes under the impact of economic shortage the connection between universal value orientations and attitudes towards different objects e g the welfare state immigrants and ethnic groups the effects of economic factors and vulnerability on values and attitudinal orientations how particular political and economic contexts produce changes in political orientations This book focuses on the interrelationship of social values attitudes and economic scarcity in the context of the last economic crisis experienced by many European countries It will appeal to scholars and students of sociology political science and economics

This book analyses some of the key problems explored in Paul Virilio's theorising on war and security Paul Virilio has developed a provocative series of writings on how modern societies have shaped the acceleration of military security technologies and how technologies of security and acceleration have transformed society economy and politics His examination of the connections between geopolitics war speed technology and control are viewed as some of the most challenging and disturbing interventions on the politics of security in the twenty first century interventions that help us understand a world that confronts problems that increasingly emerge from the desire to make life safer faster networked and more efficient Security Technology and Global Politics examines some of the key concepts and concerns in Virilio's writings on security society and technology endo colonization fear and the war on terror cities and panic cinema and war ecological security and integral accidents universities and ideas of progress Critics often point to an apocalyptic or fatalistic element to Virilio's writings on global politics but this book challenges this apocalyptic reading of Virilio's work suggesting that while he doesn't provide us with easy solutions to the problems we face the political force in Virilio's work comes from the questions he leaves us with about speed security and global politics in times of crisis terror and fear This book will be of interest to students of critical security studies political theory sociology political geography cultural studies and IR in general
