Serving the Stigmatized is the first book of its kind that explores best practices when dealing with a specific prison population while under some form of institutional control If the established goal of a correctional facility is to rehabilitate then it is imperative that the rehabilitation is effective and does not simply serve as a political buzz word The timing of releasing this book coincides with a real movement in the United States supported by both conservative and liberal advocates and foundations to decrease the size of the prison population by returning more offenders to their communities The text examines 14 specific populations and how to effectively treat them in order to better serve them and our communities

The book's analysis draws on current research as well as the President's Task Force on 21st Century Policing and the reforms embodied in Justice Department consent decrees. New to the Third Edition: The national crisis over police legitimacy and use of force is put into context through extensive discussions of recent police shootings and the response to this national crisis, providing readers a valuable perspective on the positive steps that have been taken and the limits of those steps. Coverage of the issues related to police officer uses of force is now the prevailing topic in Chapter 3 and includes detailed discussion of the topic, including de-escalation, tactical decision making, and the important changes in training related to these issues. An updated examination of the impact of technology on policing, including citizens' use of recording devices, body worn cameras, open data provided by police agencies, and use of social media, explores how technology contributes to police accountability in the United States. A complete, up-to-date discussion of citizen oversight of the police provides details on the work of selected oversight agencies, including the positive developments and their limitations, enabling readers to have an informed discussion of the subject. Detailed coverage of routine police activities that often generate public controversy now includes such topics as responding to mental health calls, domestic violence calls, and police stop and frisk practices. Issues related to policing and race relations are addressed head-on through a careful examination of the data, as well as the impact of recent reforms that have attempted to achieve professional, bias-free policing.

Policing Human Rights Richard Martin, Human rights are a common feature of police reform rhetoric and regulation in many jurisdictions. Yet how human rights law might serve to regulate policing, function as a discourse for describing what police do or perform as, or as a critical concept for engaging with what the police role is or ought to be, has received limited attention. This book is an endeavour to produce one of the first sustained interdisciplinary accounts of the empirical realities of human rights law in policing. The substantive insights are drawn from unprecedented access to the Police Service of Northern Ireland. The book takes the reader on a tour of four sites of policing: the public forums, host to official police narratives; routine policing; public order policing; and police custody. It seeks to better understand how and why police officers, performing different aspects of policing, operating in distinct regulatory sites, and enacting their own identities and experiences, come to encounter and engage with human rights law in their everyday work. The book aspires to embrace criminology's interdisciplinary spirit, drawing on concepts from criminology itself, as well as law, anthropology, sociology, and organizational studies, to illuminate the empirical realities of human rights law. It offers a series of findings and insights that expose how human rights law functions in modern policing and the histories, imaginations, visions, and values police officers express in narratives, sensemaking, and practices of routine police work.
