Lehmann,Oddgeir Synnes,2023-05-18 Exploring the potential of poetry and poetic language as a means of conveying perspectives on later life this book examines questions such as how can we understand ageing and later life and how can we capture the ambiguities and complexities that the experiences of growing old in time and place entail As poetic language illuminates transfigures and enchants our being in the world it also offers insights into the existential questions that are amplified as we age including the vulnerabilities and losses that humble us and connect us This volume suggests a path towards the poetics of ageing by means of presenting analyses of published poetry on ageing ranging

from William Shakespeare to George Oppen the use of reading and writing poetry among lay people in old age including persons living with dementia and the poetic nuances that emerge from other literary practices and contexts in relation to ageing counting personal poetic reflections from many of the contributing authors   <u>Cultural Perspectives on Aging</u> Andrea Hülsen-Esch,2021-11-22 Current demographic developments and change due to long life expectancies low birth rates changing family structures and economic and political crises causing migration and flight are having a significant impact on intergenerational relationships the social welfare system the job market and what elderly people can expect from their retirement and environment The socio political relevance of the categories of age and ageing have been increasing and gaining much attention within different scholarly fields However none of the efforts to identify age related diseases or the processes of ageing in order to develop suitable strategies for prevention and therapy have had any effect on the fact that attitudes against the elderly are based on patterns that are determined by parameters that or not biological or sociological age ing is also a cultural fact This book reveals the importance of cultural factors in order to build a framework for analyzing and understanding cultural constructions of ageing bringing together scholarly discourses from the arts and humanities as well as social medical and psychological fields of study The contributions pave the way for new strategies of caring for elderly people   *Literature and Medicine* Anna M. Elsner,Monika Pietrzak-Franger,2024-01-18 The experiences of health and illness death and dying the normal and the pathological have always been an integral part of literary texts This volume considers how the two dynamic fields of medicine and literature have crossed over and how they have developed alongside one another It asks how medicine as both science and practice shapes the representation of illness and transforms literary form It considers how literary texts across genres and languages of disease have put forward specific conceptions of medicine and impacted its practice Taking into account the global multilingual and multicultural contexts this volume systematically outlines and addresses this double sidedness of the literature medicine connection Literature and Medicine covers a broad spectrum of conceptual thematic theoretical and methodological approaches that provide a solid foundation for understanding a vibrant interdisciplinary field
