

Population Distributions

How does population distribution affect the outcome?

Why?

Alaska encompasses 377 million acres of unoccupied forest land, it is the largest state in the United States, yet with a population of under 700,000 people there are some interesting facts in Alaska. For example, there is more than one million acres of forest in a population of under 7 million. How about 1/3 of the 1/3 of the forest land area is unoccupied? What are the reasons for this high population density? How does this affect the outcome of the election?
