General paralysis of the insane GPI the most commonly diagnosed of the neurosyphilitic disorders has been devastating both in terms of its severity and incidence Using the rich laboratory and asylum records of lowland Scotland as a case study Gayle Davis examines the evolution of GPI as a disease category from a variety of perspectives social medical and pathological Through exploring case notes and the impact of new diagnostic techniques and therapies such as the Wassermann Test and Malarial Therapy the reader gains a unique insight into both patients and practitioners Significant insights are gained into the socio sexual background and medical experience of patients as well as the clinical ideas and judgmental behaviour of the practitioners confronting this disease The Cruel Madness of Love will be of interest to anyone wishing to explore the historical relationship between sexuality morality and disease Unusually Cruel Marc Morjé Howard, 2017-06-16 The United States incarcerates far more people than any other country in the world at rates nearly ten times higher than other liberal democracies Indeed while the U S is home to 5 percent of the world s population it contains nearly 25 percent of its prisoners But the extent of American cruelty goes beyond simply locking people up At every stage of the criminal justice process plea bargaining sentencing prison conditions rehabilitation parole and societal reentry the US is harsher and more punitive than other comparable countries In Unusually Cruel Marc Morjé Howard argues that the American criminal justice and prison systems are exceptional in a truly shameful way Although other scholars have focused on the internal dynamics that have produced this massive carceral system Howard provides the first sustained comparative analysis that shows just how far the U S lies outside the norm of established democracies And by highlighting how other countries successfully apply less punitive and more productive policies he provides plausible solutions to addressing America s criminal justice quagmire

The Werner Universal Educator, 1900 **Interrogating Neoliberalism and Cruel Optimism in Education** Louise Azzarello, 2025-03-31 This book is a philosophical examination of the ways in which neoliberalism underpins and impedes public education It proposes that education s adoption of neoliberal logic generates a sense of despair amongst educators who often enter the profession with the hope of building a better more just world Drawing on the author s 27 years of experience as a secondary classroom teacher and engaging with a range of theoretical concepts cultural objects and scenes of violence from her time in the classroom *The Radical Potency of Despair* renders visible the ongoing harms that neoliberal logic creates for education and educators The author proposes a new ruptured fantasy of education and suggests that it is not hope that ignites educators who keep fighting for education but rather despair Despair is conceived of as a generative force provoking educators to hold time and space open for pedagogical encounters that interrupt the ongoing instrumentalization of education The author further conceptualizes a notion of thinking with images as a pedagogical interruptive force Thinking with images she argues gives students time and space to attend to what they see thus affording them the chance to think differently about the violence of modern society Such pedagogical interruptions are presented as a refusal of the normative order of education countering present infrastructures that aim to constrain and instrumentalize

education A compelling and original volume it will appeal to scholars researchers and upper level students with interests in neoliberalism and education the philosophy of education critical pedagogy and educational policy and politics
