these approaches the main strengths of humanities have been identified in the ability to promote critical thinking and analytical reasoning provide knowledge and understanding of democracy and social justice develop leadership cultural and ethical values The main problems of humanities are the lack economic relevance the socio institutional perception of them as impractical and unemployable the fact that they do not match with technological development Finally the resulting crisis consists mainly in the absence or radical reduction of funding from institutions a decrease in student numbers a decrease in interest a loss of centrality in society A Numanities New Humanities project should consider all these aspects with self critical assessment on the first line The goal is to unify the various fields approaches and also potentials of the humanities in the context dynamics and problems of current societies and in an attempt to overcome the above described crisis Numanities are introduced not as a theoretical paradigm but in terms of an umbrella concept that has no specific scientific content in it that particularly means that the many existing new fields and research trends that are addressing the same problems post humanism transhumanism transformational humanities etc are not competitors of Numanities but rather possible ways to them Therefore more than a theoretical program Numanities intend to pursue a mission and that is summarized in a seven point manifesto In the light of these premises and reflections the book then proceeds to identify the areas of inquiry that Numanities in their functions and comprehensive approach seek to cover The following list should also be understood as a statement of purposes for this entire book series These in other words will be the topics areas we intend to represent Once elaborated on the foundations of Numanities the book features a second part that presents two case studies based on two relatively recent and now updated investigations that the author has performed in the fields of musical and animal studies respectively The two cases and relative areas of inquiry were selected because they were considered particularly relevant within the discussion of Numanities and in two different ways In the first case study the author discussed the most typical result or perhaps cause of the technophobic attitude that was addressed in the first part of the book the issue of authenticity as applied in the author s particular study to popular music In the second case study he analyzes two different forms of comparative analysis between human and non human cognition like in the former case this study too is aimed at a critical commentary on what the author considers redundant biases in current humanistic research anthropocentrism and speciesism
