given topic or issue is inevitable The book encompasses in its fold a wide range of business and policy issues in the Indian setup Further in view of the fact that the various papers included in the present volume are authored by researchers with diverse interests and backgrounds it is not surprising that each paper may look unique even in terms of its structure of presentation too In such a situation the editor s dilemma should not be difficult to imagine for the reader As editors of this volume therefore we deliberately preferred to keep the author s style arguments or conclusions intact In more precise terms the papers included in this volume are largely in their original form and content Although we not being completely oblivious of our editorial responsibilities have attempted some cosmetic aesthetics here and there in respect of some papers

energy reform approved by Congress in 2013 will for the first time in decades open the nationalised oil industry to foreign investment while a new public private partnership law is set to provide the climate of legal certainty needed to attract private investment in the myriad of sectors undergoing expansion While challenges remain in particular informality and deficient domestic supply chains growth prospects remain positive for the second largest economy in Latin America

Marketing Issues in Transitional Economies Rajeev Batra,1999-08-31 As the markets in transitional economies open and grow major challenges and opportunities arise for multinational firms entering these markets local firms facing these new competitors and policymakers seeking to increase the ability of all firms to compete fairly and efficiently Yet despite the important questions transition economies pose for policymakers and companies seeking to enter and compete in these new markets there has been a relative absence of systematic research on these concerns This book seeks to fill a gap in the existing literature by offering a pioneering and comprehensive examination of issues that have developed as markets in transitional economies become more deregulated and open The countries discussed include China the Czech Republic Hungary India Poland Romania Russia South Africa and South Korea The topics covered are divided into five main sections and the individual chapters are written by some of the world's leading academic experts on these issues Most of the authors draw from freshly collected data in new studies of consumers and or firms in transitional economies After an opening section which discusses the marketing issues and

challenges multinational and local firms face in transitional economies the next three sections offer detailed treatments of changing consumer behavior measuring and improving the marketing orientation of firms and implementing and managing distribution channels The fifth and final section is devoted to firm strategies and tactics examined variously from the perspective of multinational firms entering these new markets from the viewpoint of existing local firms facing new competitive challenges from global entrants and from the perspective of local firms seeking to establish themselves in foreign markets where they have not previously competed Most of the individual chapters are revised versions of papers originally presented at a conference sponsored by the William Davidson Institute which focuses on research related to emerging and transitional economies and have not previously appeared in published form Thus the book is a unique collection of cutting edge scholarship on the various aspects of marketing in transitional economies It will prove valuable reading to academics policymakers and international business strategists
