

## Lead Service Line Inventory Template Instructions

The Lead & Copper Rule Revisions published on December 16, 2021, includes the requirement for Community Water Systems and Non-Community Non-Transient Water Systems to prepare lead service line (LSL) inventories by October 16, 2024. LSL inventories provide critical information on the locations of potentially high drinking water lead exposure. All service lines connected to the public water distribution system require inventory regardless of ownership status and includes consecutive connections, water haulers or water bottlers.

The following requirements are directly tied to the service line inventories:

- New site sampling plans
- Compliance Sampling methods
- LSL replacement plans
- LSL replacements

See helpful illustration below showing Water Main, Main-Curbstop, Curbstop-Building and Building which are all service lines that are included in the inventory.

### Detailed Lead Service Line Inventory Template Instructions

**Purpose:** Water systems will use this template to record materials for each service line in their distribution system and report inventory to MTDEQ.

**General Instructions:**

- Select the appropriate inventory worksheet for your water system
  - MTDEQ Template for Community Water Systems
  - MTDEQ Template for Non-Community Non-Transient Water Systems
