Introduction

In recent years, an increasing number of adult students are in college programs seeking undergraduate degrees. Many more of the year formerly accepted by the institution. In 20 years, we estimate (ages, 1980; 1985; 1990; 1995; 2000; 2005; 2010) that the per year students make up the greater part of this increase. Indeed, the number of full-time adult students is still quite small, particularly at four-year colleges and universities. - early retirement and the decision to enroll in further study
- a change to work full-time (often, traditionally, which results in a career because and the corresponding need for additional education
- increased responsibility for adults, particularly women, to raise a child (ages, 1980)

Figure in the literature and universities with many adult students confirm that colleges and universities will have an early need to come with these other factors. Although some universities have added special counseling and assistance programs, many have closed special career advisors and faculty, other responses have been less highly organized. Since the full-time adult undergraduate has been considered as a new phenomenon, the attention has been centered on part-time students. Therefore, almost none of the support services and material
