C/C: "I have been coughing for two weeks."

HPI: This is a 45-year-old African American female who presents here today with complaints of cough 8/10. The patient reports chest discomfort 7/10 severity and chills X2 a day. Over the past two weeks, she has noticed the production of white mucus several times. A week ago, she had a fever of 101 with relief of over-the-counter Tylenol 500 mg two times every five hours that day. Associated symptoms include expressive fatigue and occasional shortness of breath. The patient denies nausea, vomiting, headache, abdominal pain, or blood in the mucus. She is sexually active; the last OB/GYN exam was in February.

PQRST: The patient was tending to flowers in her garden at the time of onset. She describes the cough as "barking" and says that she has been feeling much worse over the past three days. The pain is in the chest, but it radiates to the lungs. The patient rates her pain at 8/10, and discomfort – at 7/10. She reports having had the symptoms for two weeks, and she has noticed that drinking cold water makes the cough worse.

Review of Systems

GENERAL: The patient does not report any major health changes apart from the cough.

HEENT: Eyes: near-sightedness. Ears, Nose, Throat: normal hearing, no throat pain, no abnormal nose discharge.
