The Capital Asset Pricing Model in the 21st Century Haim Levy, 2011-10-30 The Capital Asset Pricing Model CAPM and the mean variance M V rule which are based on classic expected utility theory have been heavily criticized theoretically and empirically The advent of behavioral economics prospect theory and other psychology minded approaches in finance challenges the rational investor model from which CAPM and M V derive Haim Levy argues that the tension between the classic financial models and behavioral economics approaches is more apparent than real This book aims to relax the tension between the two paradigms Specifically Professor Levy shows that although behavioral economics contradicts aspects of expected utility theory CAPM and M V are intact in both expected utility theory and cumulative prospect theory frameworks There is furthermore no evidence to reject CAPM empirically when ex ante parameters are employed Professionals may thus comfortably teach and use CAPM and behavioral economics or cumulative prospect theory as coexisting paradigms

Essentials of Investments Bodie, Alex Kane, Alan J. Marcus, 2010-09-01 This market leading undergraduate investments textbook emphasises asset allocation while presenting the practical applications of investment theory The authors have eliminated unnecessary mathematical detail and concentrate on the intuition and insights that will

be useful to practitioners throughout their careers as new ideas and challenges emerge from the financial marketplace The eighth edition has been fully updated to reflect the recent financial crisis and includes a new chapter on Hedge Funds

The Lunacy of Modern Finance Theory and Regulation Les Coleman, 2014-08-01 This provocative book provides insight into a finance industry that is run for the benefit of banks and service providers who rely on Beatles era theories and regulation which are totally unsuited to the modern world The author has a near unique perspective based on over 30 years of working literally around the globe for corporates fund managers and as finance academic In his last role his research has focused on investment decisions and during 2012 he interviewed 34 fund managers in Istanbul London New York and Melbourne He blends rich understanding of finance theory and practice to unravel the investment industry s structure and show how banks and other finance institutions privilege themselves at investors expense The book highlights that finance industry self regulation is weak Risks from inexpertise theft bad data and other sources are high Regulation of the industry appears to be ineffectual with the setting of such a high bar that it is virtually impossible to successfully prosecute even the most blatant and egregious offenders The book closes with the simple suggestion that corporations regulations be altered to introduce the strict liability offence of being a director or officer of a large bank that becomes bankrupt This follows the strategy of legislation that has been effective in cleaning up the environment making workplaces safer and reducing crime by punishing those responsible for an offence
